## EXECUTIVE SUMMARY

King EPCM was retained by Coral Creek Homes, (the Client) to conduct a Phase I Environmental Site Assessment (ESA) of the property located at 202 Brock St. East, Uxbridge, ON (the Site).

It was understood that the Phase I ESA documented herein was being undertaken by the Client for the purpose of a residential development project. Records of Site Condition (RSC) will be required as per O.Reg 153/04, as the Client intends to develop the currently commercial property into a residential property. The last work date for the records review, interviews, and site reconnaissance for the Phase I ESA was May 4th, 2023 (per Section 28 of O. Reg. 153/04).

The Site had an area of approximately 1489 m<sup>2</sup> according to Durham Region Mapping. The Site is situated at the northwest corner of the intersection of Nelkydd Lane and Brock Street East, Town of Uxbridge, Durham Region, Ontario. The Site has a single residential-style building at the central portion of the property, used as a retail commercial building by “Quilters Cupboard”, a fabric and knitting supplies retail store. There is a stormwater management pond and a local highschool south of the subject property, while all other directions (north, east, and west) is composed of residential buildings.

The site's investigation scope included an extensive review of historical records associated with the Site, site reconnaissance, and interviews based on the Reg. 153/04 requirements. The report documented the findings based on relevant information and made conclusions for the likelihood of Areas of Potential Environmental Concern (APEC) associated with the Potentially Contaminating Activities (PCAs).

The Phase I ESA by King EPCM identified no onsite and four (4) offsite PCAs, with no APECs on the Phase I property. King EPCM recommends that no additional investigations are required.

Records of Site Condition (RSC) submissions will be required as per O.Reg 153/04, as the proposed land-use will be moving to a more sensitive land-use (from commercial use to residential use).

This report has been prepared for the sole use of Coral Creek Homes (the Client), or any financial institutions for due-diligence purposes. This report was considered the intellectual property of King EPCM, and third-party use of this report, including reliance, in part or full, was prohibited without written consent from King EPCM.

## 1. INTRODUCTION

King EPCM was retained by Coral Creek Homes, (the Client) to conduct a Phase I Environmental Site Assessment (ESA) of the property located at 202 Brock St. East, Uxbridge, ON (the Site).

It was understood that the Phase I ESA documented herein was being undertaken by the Client for the purpose of a residential development project. Records of Site Condition (RSC) will be required as per O.Reg 153/04, as the Client intends to develop the currently commercial property into a residential property.

### 1.1. PHASE I PROPERTY INFORMATION

The Site had an area of approximately 1489 m<sup>2</sup> according to Durham Region Mapping. The Site is situated at the northwest corner of the intersection of Nelkydd Lane and Brock Street East, Town of Uxbridge, Durham Region, Ontario. The Site has a single residential-style building at the central portion of the property, used as a retail commercial building by “Quilters Cupboard”, a fabric and knitting supplies retail store. There is a stormwater management pond and a local highschool south of the subject property, while all other directions (north, east, and west) is composed of residential buildings.

The legal descriptions were as follows according to ON Lands.

Site Address:	202 Brock Street East, Uxbridge
PIN:	26842-0089 (LT)
Owner:	1093560 Ontario Limited
Legal Description:	PT LTS 51 & 52, PL H50061 & PT W 1/2 LT 30, CON 7, UXBRIDGE, PT 1, 40R4323

## 2. SCOPE OF INVESTIGATION

The Phase I ESA was completed in general accordance with the O. Reg. 153/04, and with the revision of O. Reg. 511/09. The report was created using:

- Historical records, such as environmental incidents, information databases, aerial photographs, and any documentation associated with the site
- Interview with the current commercial tenant
- Site reconnaissance

The final results of the report were:

- Identification of the Phase I Study Area
- Identification of PCA's within the study area
- Likelihood of PCAs to influences the Phase I property
- Identification of any APECs within the site due to PCA's with a high likelihood of influence & contamination
- Phase I Conceptual Site Model (CSM)
- Identification of the possible requirement of the ESA Phase II Report

### **3. RECORDS REVIEW**

#### **3.1.GENERAL**

##### **3.1.1. PHASE I STUDY AREA DETERMINATION**

As per O. Reg. 153/04, the Phase I study area is a 250 m radius from the outer boundary of the site property, while the Phase I property refers to the property that is the subject of the Phase I ESA (the Site). For this study, all properties, or parts of a property, that is within the 250 m radius are considered to be within the study area. See attached Appendix I for a detailed map of the Phase I study area.

##### **3.1.2. FIRST DEVELOPED USE DETERMINATION**

According to the aerial pictures, the Site was undeveloped land up during 1960's. The Site was developed as a roadside residential dwelling in 1981, based on Pinchin's historic ESA Phase I Report. 1980's aerial photographs show Brock St East as developed with several roadside dwellings, including the subject property. Based on historic land transfer titles, a formal legal Registered Plan (40R4323) was submitted and created in 1978, and the residential dwelling was estimated to have been constructed after that time.

##### **3.1.3. FIRE INSURANCE PLANS**

No fire insurance plans were available.

##### **3.1.4. CHAIN OF TITLE**

The information from Ontario Land Property Records Portal, Ontario Land Registry Access [www.onland.ca](http://www.onland.ca) (Onland), and the GeoWarehouse Property Reports were reviewed for a chain of title searches. The current owner was 534609 Ontario Ltd. and has owned the property since November 1984.

A summary description of the current and past uses of the site was listed as follows:

**Table 1 - Chain of Title**

Year Period	Party To:
Nov 2022 - Present	1093560 Ontario Limited
Jul 2016 - Nov 2022	2521616 Ontario Inc. O/A Quilters Cupboard
Jul 13 - Jul 2016	Quilters Cupboard; Carmichael, Philip; Carmichael, Susan
Jun 2002 - Jul 2013	Quilters Cupboard; Carmichael, Philip; Carmichael, Susan; Brumwell, Wendy; Brumwell, Wayne
Jun 1994 - Jun 2002	Wilson, Earl Joseph; Wilson, Marie Louise
Mar 1987 - Jun 1994	Owen, Robert; Owen Sandra
Aug 1983 - Mar 1987	Lambert, James Charles; Lambert, Ruth Edith
May 1982 - Aug 1983	Guest, Mark; Maennicke, Christina
May 1980 - May 1982	Kydd, Gerald G.; Kydd, Mary C.
Apr 1931 - May 1980	Kydd, George F. & Spouse
Apr 1914 - Apr 1931	Stokes, Mary Eliz. (estate of Stokes, George)
Prior 1914	Illegible, does not assist with ESA Phase I

Note: a chain of the title earlier than the 1914 becomes illegible, and does not assist with further determination of possibility of contamination in the Phase I study area

### 3.1.5. PREVIOUS ENVIRONMENTAL REPORTS

King EPCM reviewed one historic environmental site assessment report:

- *Phase I Environmental Site Assessment, 202 Brock Street East, Uxbridge, Ontario, July 26, 2021, Pinchin, (CSA Z768-01 standard)*

### 3.2. ENVIRONMENTAL SOURCE INFORMATION

King EPCM reviewed the data primarily provided by Environmental Risk Information Services (ERIS) for environmental source information gathering. The information ERIS gathered included historical records for PCAs within the Phase I study area through various federal, provincial, and private resources.

ERIS has conducted a database search and compiled environmental source information from 73 different databases, and a total of 135 reports were identified for the Phase I study area. As part of the search and compilation of the 73 environmental databases, all requirements of Paragraph 7 of subsection 3 (2) of O. Reg. 153/04 were satisfied.

Below were the major categories which returned positive results that required additional review.

- Ontario Regulation 347 Waste Generation Summary
- Fuel Oil Spills and Leaks
- Pipeline Incidents
- Ontario Spills

The full ERIS database report can be found in Appendix III.

### 3.3. PHYSICAL SETTING SOURCES

#### 3.3.1. AERIAL PHOTOGRAPHS

Historical aerial photographs associated with the Site were reviewed from Ministry of Natural Resources and Forestry, specifically 1954, 1960's, and 1980's.

Aerial photographs show that the Site was undeveloped in 1954 and 1960's. The subject property was shown to be developed in 1980's, with Pinchin estimating the property to be developed in 1981.

**Table 2 - Aerial Photograph by Year**

Year	Description of Phase I Property	Adjacent Properties within Phase I Study Area
1954	Undeveloped farmland	undeveloped farmland, residential to the west
1960's	undeveloped vacant land	residential development to the west, farmland to the north, east and south
1980's	single family dwelling along Brock St E	Additional residential buildings along Brock St E, otherwise farmland to the north, south, and east of property
2005	single family dwelling used as commercial retail store	residential buildings to the north, west, and south, with a storm pond to the south and school to the southwest
2017	single family dwelling used as commercial retail store	similar to 2005, no change
2021	single family dwelling used as commercial retail store	additional residential buildings to the northeast and east of the subject property

The aerial photographs can be found in Appendix V.

### **3.3.2. TOPOGRAPHY, HYDROLOGY, GEOLOGY**

The topographic information from the Ontario Base Map (OBM) and the Ministry of Natural Resources and Forestry (MNRF) was reviewed, and the information can be found in Appendix VI. The Phase I property was located in a relatively flat area with a general elevation of approximately 273 m (amsl). The general surface drainage is towards the north.

The Bedrock Geology Ontario Report from ERIS was reviewed. The rock type included Shale, limestone, dolostone, and shale, and the primary strata contained Georgian Bay Formation, Blue Mountain Formation, Billings Formation, and Collingwood Member.

The Surficial Geology of Southern Ontario from ERIS indicated that the surficial materials on the Site contained coarse sandy loam with high infiltration rate potentials.

### **3.3.3. FILL MATERIALS**

According to the aerial photograph, historical records, and the Site reconnaissance, no presence of fill materials was identified.

### **3.3.4. WATER BODIES & AREAS OF NATURAL SIGNIFICANCE**

Based on OBM and MNRF Topographic Maps, there was no water body on the Site. However, there is a stormwater pond approx. 8m south of the subject property, within the Phase I Study area. Based on the information about the Area of Natural & Scientific Interest (ANSI) from ERIS, there was no ANSI within the Site and Phase I Study Area, as defined by the MNRF.

### **3.3.5. WELL RECORDS**

According to the available historical well records and the database from the Ministry of the Environment, Conservation, and Parks (MECP), there were no records of historical groundwater wells inside the subject property. There were 66 well records in the study area of the Phase I property, some of the wells don't have soil conditions data, the well with the soil condition data and closest to the Site was located towards the east of the subject Site, with the well records (ID 1910770) representing the local soil conditions as follows:

- 0 – 12ft      brown clay, soft
- 12 – 17ft     grey clay, soft
- 17 – 57ft     blue silt, soft
- 57 – 70ft     brown sand, medium
- 70 – 80ft     brown sand, medium, clean (water found at 80ft, clean)

The well records can be found in Appendix IV.

### **3.4. SITE OPERATING RECORDS**

The Site was on commercial land use with a converted residential building used by Quilters Cupboard, a commercial retail fabric and knitting supplies retail store. There were no site operating records, as they generally do not sell or store any potentially contaminating materials or conduct any potentially contaminating activities.

## 4. INTERVIEWS

The interview was conducted by Tony Wang, Principal Engineer of King EPCM, with Kim Hunt, owner of 2521616 Ontario Inc, over the phone on May 4<sup>th</sup>, 2023. After cross-referencing the information from the interviews against records, it was confirmed that the person interviewed was knowledgeable and reliable regarding the Site property.

The following was a summary of the information received from the interview:

Kim Hunt

Date: May 4<sup>th</sup>, 2023

- Kim Hunt has been the owner of 2521616 Ontario Inc. and has purchased the business “Quilters Cupboard” and the property in 2016
- The property was purchased from the Carmichael family in 2016, which previously were operating the business under the same name of “Quilters Cupboard”
- Completed a private ESA Phase I Report in 2021 by Pinchin (CSA standards)
- Pinchin Report in 2021 concluded no additional investigations are required, and that nothing was identified that is likely to result in potential subsurface impacts at the Site
- There were no environmental concerns, reports, spills, or potentially contaminating activities on the Site to her knowledge

## 5. SITE RECONNAISSANCE

### 5.1. GENERAL REQUIREMENTS

The Site investigation of the Phase I study area was conducted by Aizaz Ali Qureshi, an Engineering Graduate of King EPCM on April 6<sup>th</sup>, 2023, under the supervision of Tony Wang, Principal Engineer of King EPCM. The investigation occurred in the following circumstances:

- Dates: April 6<sup>th</sup>, 2023
- Weather condition: 10°C overcast
- The Site was inspected and observed, with an in-depth investigation of the property.
- The site photographs were taken during the site investigation and can be found in Appendix II.
- Neighbouring activities were also observed during the Site reconnaissance.

## 5.2. SPECIFIC OBSERVATIONS AT PHASE I PROPERTY

### 5.2.1. SITE DESCRIPTION

The site was under commercial retail use and was used by Quilters Cupboard, a retail fabric and knitting store

- The Site was situated at 202 Brock St East, Uxbridge
- The Site was used by Quilters Cupboard, a retail fabric and knitting store
- There are no chemical storage at subject property, although there were significant storage of retail materials within the basement
- Basement contained retail supplies, with a relatively new natural gas forced air furnace system
- Basement concrete slab was in general good condition, with no staining or cracks
- No groundwater wells were observed on the property.
- There was no pond or water body within the property.
- There was no sign of stressed vegetation in the grassland.

### 5.2.2. SITE UTILITIES

The drinking water system and sewage system were provided by the Township of Uxbridge, with underground pipelines for the property. The electricity was supplied by Hydro One through underground cables. The natural gas was provided by Enbridge through underground pipes.

### 5.2.3. BUILDING DESCRIPTION

The onsite building is described as follows:

- The Site contained a single-story building with a basement for retail storage.
- The building has the general characteristics of a residential dwelling, most likely converted in the early 2000's by the previous owners
- There is a small asphalt-shingled shed for general storage

### 5.2.4. WELLS AND SUB-SURFACE HISTORY

According to the available historical well records and the database from the Ministry of the Environment, Conservation, and Parks (MECP), there were no records of historical groundwater wells inside the subject property. There were 66 well records in the study area of the Phase I property, some of the wells don't have soil conditions data, the well with the soil condition data and closest to the Site was located towards the east of the subject Site, with the well records (ID 1910770) representing the local soil conditions as follows:

- 0 – 12ft      brown clay, soft
- 12 – 17ft      grey clay, soft

- 17 – 57ft blue silt, soft
- 57 – 70ft brown sand, medium
- 70 – 80ft brown sand, medium, clean (water found at 80ft, clean)
- 

The well records can be found in Appendix IV.

### 5.2.5. NON-BUILDING INVESTIGATION

The property has the characteristics of a single family residential dwelling, with a normal front yard and rear yard. However, the actual driveway onto the property (as well as a small parking area) is along Nelkydd Lane. The small parking lot allows for several employee and customer / visit parking.

The front yard is considered as landscaped grass, with several utility poles and a single honey-comb stormwater catch basin the front yard.

### 5.2.6. ENHANCED INVESTIGATION PROPERTY

The Site was not considered to be an Enhanced Investigation Property as described in Section 32 (1) (b) of O. Reg. 153/04.

## 5.3. WRITTEN DESCRIPTION OF THE INVESTIGATION

The Site investigation of the Phase I study area was conducted by Aizaz Ali Qureshi, an Engineering Graduate of King EPCM on April 6<sup>th</sup>, 2023, under the supervision of Tony Wang, Principal Engineer of King EPCM, to identify, describe, and document specific items of the Site and surrounding properties within the Phase I study area, under Schedule D of O. Reg. 153/04.

The Site investigation included a perimeter inspection of the Site property, with detailed inspection for specific features within the Site and the evidence of PCAs onsite. The Site investigation also included the surrounding Phase I study area, to check for stressed vegetation, stained areas, and any visible air emissions / potentially contaminating activities.

The summary of the investigation is as follows.

PCA #1 offsite:	PCA#55 Transformer Manufacturing, Processing and Use
PCA #2 offsite:	Waste Generator History – Transformer Station
PCA #3 offsite:	Waste Generator History – Uxbridge secondary school
PCA #4 offsite:	PCA #40 Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

After review of all the Potentially Contaminating Activities within the Phase I Study Area, the Engineer concludes that there are no Area of Potential Environmental Concern (APEC) within the subject property.

## 6. REVIEW AND EVALUATION OF INFORMATION

### 6.1. CURRENT AND PAST USES

During site reconnaissance, the subject property Site at 202 Brock St. East, Uxbridge is currently a commercial land use. The Site was estimated to be developed in 1981 as a single family residential dwelling, and converted into retail commercial use in 2002 (as per Uxbridge Zoning By-law No. 2002-057 and 2002-143).

A summary description of the current and past uses of the site was listed as follows:

**Table 4 - Current and Past Uses of the Site**

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from aerial photographs, fire insurance plans, etc.
Nov 2022 - Present	1093560 Ontario Limited	Currently retail commercial, but proposed for residential land use	Commercial Use	
Jul 2016 - Nov 2022	2521616 Ontario Inc. O/A Quilters Cupboard	Single family dwelling converted into retail commercial	Commercial Use	off-site residential development in the north and east of subject property
Jul 13 - Jul 2016	Quilters Cupboard; Carmichael, Philip; Carmichael, Susan	Single family dwelling converted into retail commercial	Commercial Use	
Jun 2002 - Jul 2013	Quilters Cupboard; Carmichael, Philip; Carmichael, Susan; Brumwell, Wendy; Brumwell, Wayne	Single family dwelling converted into retail commercial	Commercial Use	Uxbridge Zoning Bylaw 2002-057 and 2002-143 allows for alternate commercial uses. In the year 2002
Jun 1994 - Jun 2002	Wilson, Earl Joseph; Wilson, Marie Louise	single family dwelling	Residential Use	
Mar 1987 - Jun 1994	Owen, Robert; Owen Sandra	single family dwelling	Residential Use	
Aug 1983 - Mar 1987	Lambert, James Charles; Lambert, Ruth Edith	single family dwelling	Residential Use	
May 1982 - Aug 1983	Guest, Mark; Maennicke, Christina	single family dwelling	Residential Use	
May 1980 - May 1982	Kydd, Gerald G.; Kydd, Mary C.	single family dwelling	Residential Use	1980's aerial photograph shows several residential dwellings along Brock Street East 1983 survey shows building.
Apr 1931 - May 1980	Kydd, George F. & Spouse	vacant / agricultural	Agricultural or other use	1954 aerial photograph shows vacant lands, as well as 1960's showing vacant land
Apr 1914 - Apr 1931	Stokes, Mary Eliz. (estate of Stokes, George)	vacant / agricultural	Agricultural or other use	
Prior 1914	Illegible, does not assist with ESA Phase I	vacant / agricultural	Agricultural or other use	

### 6.2. POTENTIALLY CONTAMINATING ACTIVITIES

Potentially Contaminating Activity (PCA) as defined in O. Reg. 153/04 is a use or activity defined in Column A of Table 2 of Schedule D, that occurs or has occurred in the Phase I property or the Phase I study area.

The onsite property was originally developed as a single family residential dwelling, and later converted into a retail commercial land-use in 2002. There were no hazardous materials stored at site, nor any Potentially Contaminating Activities within the ESA Phase I property. There are several Potentially Contaminating Activities within the Phase I study area:

The summary of the investigation is as follows.

PCA #1 offsite: PCA#55 Transformer Manufacturing, Processing and Use  
PCA #2 offsite: Waste Generator History – Transformer Station  
PCA #3 offsite: Waste Generator History – Uxbridge secondary school  
PCA #4 offsite: PCA #40 Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications

**Table 5 - List of Potentially Contaminating Activities (PCAs)**

PCA #	PCA Location (on or off-site)	Activity Description	Location	Address	Distance from Site (m)	Elevation Difference (m)	Associated Area of Potential Environmental Concern (APEC)
PCA #1	offsite	PCA#55 Transformer Manufacturing, Processing and Use	Northwest of ESA Phase I property	165 Brock Street East, Uxbridge	97m	- 2m	No
PCA #2	offsite	Waste Generator History – Transformer Station	Northwest of ESA Phase I property	165 Brock Street East, Uxbridge	97m	- 2m	No
PCA #3	offsite	Waste Generator History – Uxbridge secondary school	Southwest of ESA Phase I Property	127 Planks Lane, Uxbridge	132m	+ 3m	No
PCA #4	offsite	PCA #40 Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	East of ESA Phase I Property	762 - 765 Regional Highway 47, Uxbridge &	230m	- 5m	No

## 6.3. AREAS OF POTENTIAL ENVIRONMENTAL CONCERN

After review of all the Potentially Contaminating Activities within the Phase I Study Area, the Engineer concludes that there are no Area of Potential Environmental Concern (APEC) within the subject property.

## 6.4. PHASE I CONCEPTUAL SITE MODEL

### 6.4.1. SITE FEATURES

The Site had an area of approximately 1489 m<sup>2</sup> according to Durham Region Mapping. The Site is situated at the northwest corner of the intersection of Nelkydd Lane and Brock Street East, Town of Uxbridge, Durham Region, Ontario. The Site has a single residential-style building at the central portion of the property, used as a retail commercial building by “Quilters Cupboard”,

a fabric and knitting supplies retail store. There is a stormwater management pond and a local highschool south of the subject property, while all other directions (north, east, and west) is composed of residential buildings.

The Site was not within the natural significance region, while there is a waterbody (stormwater management pond) 8m south of the ESA Phase I property.

#### 6.4.2. ADJACENT PROPERTIES

The Site is situated at 202 Brock Street East, Uxbridge, with residential developments in close proximity to the Site.

A description of the adjacent properties is summarized below:

**Table 7 – Adjacent Properties**

Adjacent Properties	North	East	South	West
Property Use	Residential Use	Residential Use / Agricultural or other uses	Residential Use	Residential Use / Institutional Use
Elevation Difference	Downgradient	Downgradient	Upgradient	Upgradient
Visible Emissions	No	No	No	No
Visible outdoor storage of hazardous chemicals	No	No	No	No

#### 6.4.3. STORAGE TANKS

No aboveground storage tanks or underground storage tanks were identified onsite.

#### 6.4.4. ASSESSMENT OF PCA / COC

Based on an extensive review of historical records, review of environmental source databases, and the Site reconnaissance, it was determined that there were four (4) Potentially Contaminating Activities (PCA's) within the ESA Phase I study area, and none within the Phase I property.

After review of all the Potentially Contaminating Activities within the Phase I Study Area, the Engineer concludes that there are no Area of Potential Environmental Concern (APEC) or an Contaminates of Concern within the subject property.

#### 6.4.5. UNDERGROUND UTILITIES

There are underground water services, sanitary sewers, natural gas lines, and power cables. An underground stormwater catch basin is also located at the front of the property boundary.

#### 6.4.6. GEOLOGY / HYDROGEOLOGY

The Bedrock Geology Ontario Report from ERIS was reviewed. The rock type included Shale, limestone, dolostone, and shale, and the primary strata contained Georgian Bay Formation, Blue Mountain Formation, Billings Formation, and Collingwood Member.

The Surficial Geology of Southern Ontario from ERIS indicated that the surficial materials on the Site contained coarse sandy loam with high infiltration rate potentials.

According to the available historical well records and the database from the Ministry of the Environment, Conservation, and Parks (MECP), there were no records of historical groundwater wells inside the subject property. There were 66 well records in the study area of the Phase I property, some of the wells don't have soil conditions data, the well with the soil condition data and closest to the Site was located towards the east of the subject Site, with the well records (ID 1910770) representing the local soil conditions as follows:

- 0 – 12ft      brown clay, soft
- 12 – 17ft      grey clay, soft
- 17 – 57ft      blue silt, soft
- 57 – 70ft      brown sand, medium
- 70 – 80ft      brown sand, medium, clean (water found at 80ft, clean)

#### 6.4.7. UNCERTAINTY

There are no uncertainty or absence of information for the Phase I ESA.

## 7. CONCLUSION

### 7.1. SUMMARY OF PHASE I ESA

It was understood that the Phase I ESA documented herein was being undertaken by the Client for the purpose of a proposed development, to convert from a commercial land-use to a residential land-use. The Phase I ESA discovered four (4) off-site Potentially Contaminating Activities (PCAs) within the study area, but did not determine any Areas of Potential Environmental Concern (APECs) within the ESA Phase I property.

### 7.2. RSC & PHASE II ESA

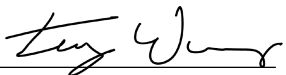

King EPCM recommend that no additional investigations are required. Records of Site Condition (RSC) submissions will be required as per O.Reg 153/04, as the proposed land-use will be moving to a more sensitive land-use (from commercial use to residential use).

### 7.3. SIGNATURES

The Phase I ESA property is located at 202 Brock Street East, Uxbridge, and the Phase I ESA investigation was conducted under the supervision of Tony Wang, the principal engineer, and a Qualified Person (QP) as in accordance with O. Reg. 153/04 and updated by O. Reg. 511/09. The last work date for the records review, interviews, and site reconnaissance for the Phase I ESA was May 4th, 2023 (per Section 28 of O. Reg. 153/04).

King EPCM accepts no responsibility or liability for any changes or potential changes in the condition of the site after the date of the last work. In assessing the environmental conditions and history of the Site, King EPCM has relied in good faith on information provided by others and has assumed the information provided as factual and accurate. King EPCM accepts no responsibility for any deficiency, misstatement, or inaccuracy in this report resulting from the information provided by others, or issues arising from relevant facts that were concealed, withheld, or not fully disclosed. This report pertains, only, to the site specifically described in this report and not to any adjacent or other property.

This report has been prepared for the sole use of Coral Creek Homes (the Client), or any financial institutions for due-diligence purposes. King EPCM accepts no liability for claims arising from the use of this report, or actions taken, or decisions made as a result of this report, by parties other than the Client.

  
Yu Tao (Tony) Wang, P. Eng.  
Principal Engineer, King EPCM  
Qualified Person, Per O. Reg. 153/04

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Oct 2022**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Mar 2022**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-May 31, 2022**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**Federal [CDRY](#)

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2021**

**Commercial Fuel Oil Tanks:**Provincial [CFOT](#)

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**Private [CHM](#)

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-May 31, 2022**

**Compressed Natural Gas Stations:**Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Sep 2022**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Feb 2023**

**Certificates of Property Use:**Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Feb 28, 2023**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Oct 2022**

**Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Feb 28, 2022**

**Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

**Government Publication Date: Oct 2011- Feb 28, 2023**

**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Feb 28, 2023**

**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Feb 28, 2023**

**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Dec 31, 2022**

**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date:** Apr 30, 2022

**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date:** Jan 1, 2011 - Dec 31, 2021

**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2022

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date:** 1988-Jun 2007\*

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date:** Jun 2000-Dec 2022

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date:** 1964-Sep 2019

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date:** May 31, 2018

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2022

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Oct 31, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 21, 2022**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2023****National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\*****Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2021****National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\*****National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018****National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\*****National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021****National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Nov 30, 2022****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Aug 2021****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Feb 28, 2023****Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014****Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** Oct 2011- Feb 28, 2023

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2021

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994 - Feb 28, 2023

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-1990, 1992-2020

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date:** 1997-Sept 2001, Oct 2004-Feb 2023

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-May 31, 2022

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date:** 1988-Mar 2021; May 2021-Oct 2021

**Wastewater Discharger Registration Database:**

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date: 1990-Dec 31, 2020**

**Anderson's Storage Tanks:**

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Apr 2020**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Feb 28, 2023**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Jun 30 2022**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
