PART E: POTENTIAL ADDITIONAL REQUIRED BACKGROUND INFORMATION

The following materials, plans and studies identified in the Township Official Plan may be required to be submitted by the Township. A determination will be made at the Pre-Consultation meeting. Where materials, plans and/or studies are required, an application will only be considered complete upon their submission.

The following information and studies prepared at the applicant's expense, and carried out by a qualified professional as determined by the Township, and, at the Township's discretion, unless required by this Plan, retained by the Township, shall generally be submitted as a basis for evaluation of development applications in the Uxbridge Urban and Coppins Corners Secondary Plan areas:

i) Background Information

A plan of survey of the subject site identifying all existing significant trees, other significant landscape features, existing buildings and structures and contours.

ii) Plans

Plans, including, where applicable, site grading and landscaping plans, elevations, and other documentation: demonstrating how the development will be integrated with the Natural Heritage System established in Section 2.3 of this Plan.

iii) Natural Heritage System

Where the site includes or directly abuts lands designated on Schedule "B" to the Uxbridge Urban Area as part of the Natural Heritage System, proposals shall be evaluated in accordance with the information submission requirements of Section 2.3 of the Plan.

iv) Tree Analysis

Where new development is to occur on a piece of land which the Township identifies as having trees which may warrant preservation or replacement, a tree preservation and planting plan shall be developed either at the time of application or as a condition of approval at the direction of the Township.

Such a plan shall:

- (a) address the nature and condition of the tree resources potentially affected by the development;
- (b) provide recommendations for tree retention and removal based on the quality of the trees, species tolerance, proposed development impacts and opportunities for mitigation, as well as a program for replanting and vegetation enhancements for new development which impacts on tree stand; and,

- (c) address the impact of the development on any abutting lands in the Environmental Constraint Area and Forest Area designations, and the woodlot management and edge/interior protection measures required to protect such areas during and after the initiation of construction.

Based on this analysis, controls will be placed on the trees to be removed, the amount and type of new landscaping to be provided on the site and related management and construction procedures through the Subdivision, Condominium or Site Plan Control Agreements.

v) Noise Impact Study

A noise impact study shall be carried out where residential uses or other sensitive uses, as defined by Ministry of the Environment guidelines, are proposed and the site is adjacent to a major noise source such as an arterial road, railway or industrial use.

Further, the requirements of the Ministry of the Environment guidelines, "Noise Assessment Criteria in Land Use Planning, October, 1995" or any successor thereto, with respect to the need for noise impact studies shall apply to new commercial, industrial or institutional development which is a potential major noise source, such as, but not limited to, uses which have associated with them on-going construction activity, outdoor heat rejection systems (including cooling towers) and outdoor exhaust fans, or other stationary noise sources such as railway yards, major truck stops, major hydro transformers, or natural gas compressors. Where required by the guidelines, a noise impact study shall be carried out to the satisfaction of the Township.

vi) Vibration Study

A vibration study shall be required at the request of the Region, the Township or the applicable railway where the site is within 75 metres (246 feet) of a railway right-of-way or an arterial road. Such a study shall be carried out to the satisfaction of the Township, in consultation with the appropriate government agency or railway.

Further, where new industrial development, which is a potential major source of vibration, such as metal forming industries including punch presses or drop forges, is proposed within 75 metres (246 feet) of existing residential development, a vibration study shall be carried out to the satisfaction of the Township.

vii) Heritage Impact Statement

Where the site includes a building of architectural and/or historical merit designated under the Heritage Act or is located in a designated Heritage District, a heritage impact statement, prepared by recognized professional(s) in the field, shall be required to be submitted to the Township. Such a study shall demonstrate to the satisfaction of the Township that:

- (a) the proposal will not adversely impact the heritage significance of the property or the area in which it is located; or,
- (b) demonstrate that it is not physically feasible to maintain the heritage building or structure.

viii) Archaeological Resource Assessment

Where there may be archaeological remains of prehistoric and historic habitation, or areas containing archaeological potential within a site, an archaeological assessment conducted by archaeologists licensed under the Ontario heritage Act shall be required. In addition, the provisions of the Cemeteries Act and its regulations shall be applied when marked and unmarked cemeteries or burial places are encountered during development, assessment or any activity.

ix) Land Use Compatibility

Where applicable, information or necessary studies shall be provided to assist in the establishment of a separation distance, having regard for the Ministry of the Environment guidelines "Compatibility Between Industrial Facilities and Sensitive Uses", between proposed development and potentially incompatible uses.

x) Stormwater Management

Where applicable, in accordance with Ministry of the Environment guidelines, a Master Drainage Plan shall be prepared, or the Township shall require a stormwater study.

xi) Soil Quality

The applicant must demonstrate that on-site soil quality is suitable for the proposed use. Where site remediation is required the Township shall be satisfied with respect to the implementation of remediation prior to development approval. Specifically, where the Township, other public body, or the applicant has identified potential site contamination, the Township shall require the applicant to complete a Phase 1 assessment, in accordance with the Ministry of the Environment's Guidelines for Use at Contaminated Sites in Ontario. The Phase 1 assessment will be reviewed by the Township to ensure there is no contamination prior to the granting of any development approvals. If there is evidence of contamination, the applicant will be required to submit a Phase 2 assessment in accordance with the Ministry of the Environment's Guidelines. If the site is found to be contaminated, the Township shall require the applicant to submit a Ministry of the Environment acknowledged Record of Site Condition to the Township to verify site clean-up prior to the granting of a building permit.

xii) Traffic Impact Analysis

Where the Township has identified concerns with traffic impacts, a traffic impact analysis carried out by a qualified transportation engineer shall be required.

xiii) Air Quality

Where the Township identifies concerns with impacts on air quality, appropriate studies by qualified professional(s) shall be required.

In addition, the following studies may be required to be submitted in the Uxbridge Urban Area as set out in Section 2 of the Official Plan:

Functional Servicing Study	Section 2.2.3.2
Market Impact	Section 2.5.17.3.1 i)
Corridor Commercial Area Development	Section 2.5.17.3.6

No future development agreements related to the Application will be executed by the Township unless all accounts and this Agreement are in good standing.

SITE DEVELOPMENT

Basic Requirements for Site Servicing Plans

The following outline is intended to assist the applicant in preparing site servicing plans for service connection and entrance permits for all developments other than single family or semi detached dwellings. If further information is required please contact the Region of Durham Works Department (905-668-7711).

General

- The applicant must submit six (6) prints of the detailed site servicing plan to the Region of Durham Works Department for approval prior to the issuance of service connection and entrance permits.
- The applicant must submit a detailed cost estimate covering all Regional services (including road works if the site fronts a Regional Road) within the right-of-way and/or easement, based on the approved site servicing plan.
- **For estimated cost of works less than \$100,000, the developer has the option of having the Region of Durham construct the works through the quotation contract process or entering into a Servicing Agreement. If the developer chooses to proceed through the quotation process the developer must provide a cheque covering the estimated cost of works including administration and contingencies to the Region of Durham Works Department prior to the project being tendered. If the deposit is less than the accepted bid plus Region of Durham administration and engineering fees after tendering, the Region of Durham reserves the right to request the additional funds from the applicant prior to awarding the contract. Once the final accounting has been completed for the project and if the actual cost of the work differs from the estimate the applicant will be either invoiced or reimbursed in accordance with Region of Durham policy.**
- If the estimated cost of Regional Services is greater than \$100,000 the applicant must enter into a servicing agreement with the Region of Durham to construct the works.
