Appendices

1. Executive Summary

GHD Limited (GHD) was retained by 2695867 Ontario Inc. to conduct a Phase One Environmental Site Assessment (ESA) of the property described as Part of Lot 35, Concession 6 in Udora, Township of Uxbridge, Ontario (hereinafter referred to as the Site or Property). The Site is currently owned by 2695867 Ontario Inc. and is vacant.

The purpose of the Phase One ESA was to identify, through a non-intrusive investigation, the existence of any Potentially Contaminating Activities (PCAs) and Areas of Potential Environmental Concern (APECs) associated with the Site. PCAs and APECs are defined in Ontario Regulation 153/04, as amended (O. Reg. 153/04). It is GHD's understanding that this Phase One ESA was completed in support of a future Record of Site Condition (RSC) filing on the central and southern parcels of the Site.

The Site is located in the community of Udora in the Township of Uxbridge, Ontario and was first developed for agricultural land use since the early 1800s. Other property uses previously included industrial land use. The Site is approximately 3.0 hectares (7.4 acres) in size and is currently vacant and idle. The Site is generally a grassy open area.

Based on the results of the Phase One ESA, including the Site inspection, information provided by Site representatives and regulatory agencies, documents reviewed, the review of Site history, and review of information from the regulatory agencies, the following APECs were identified to be associated with the Site:

- **APEC #1 – Potential Historic Application of Pesticides:** No information was available regarding the crops historically grown at the Site, or to exclude the potential for pesticides use as part of historic agricultural practices. Application of organic, inorganic and synthetic pesticides were common practice in Ontario upon until the late 1900's. No information was available regarding historic agricultural practices, or the types/quantifies of any pesticides used at the Site. For these reasons, the potential application of pesticides has been identified as a PCA at the Site (Pesticides [including Herbicides, Fungicides and Anti-Fouling Agents] Manufacturing, Processing, Bulk Storage and Large-Scale Applications). The northern portion of the Site was previously investigated by WSP in 2016 for environmental impacts from the application of pesticides. No impacts in soil and groundwater to the northern portion of the Site were found. A Record of Site Condition was acknowledged by the Ministry of the Environment, Conservation and Parks (MECP) for the northern portion of the Site. As such, the central and southern portion of the Site was identified as **APEC #1**.
- **APEC #2 – Former Salvage Yard:** A salvage yard was identified on the Site between the 1950s and early 1970s. No information was available regarding historical chemical or waste material handling and storage. The former salvage yard was identified as a PCA (#49 – Salvage Yard, Including Automobile Wrecking) in accordance with O. Reg. 153/04. The northern portion of the Site was previously investigated by WSP in 2016 for environmental impacts from the salvage yard. No impacts in soil and groundwater to the northern portion of the Site were found. A Record of Site Condition was acknowledged by the MECP for the northern portion of the Site. As such, the central portion of the Site was identified as **APEC #2**.
- **APEC #3 – Road Salt Application:** Road salt has been applied along adjacent/nearby roadways during winter months for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both. Bulk salt has not been stored at the Site. The application of road salt in the vicinity of the Site has the potential to result in elevated sodium adsorption ratio (SAR) and electrical conductivity (EC) in soil, and sodium and chloride in groundwater, and would have the potential to contribute to an APEC at the Site and was identified as **APEC #3**. However, in accordance with paragraph 1 of Section 49.1 of O. Reg. 153/04, any potential on-Site exceedances of SAR, EC, sodium, or chloride associated with the application of the road salt would be deemed as having met the applicable Site Condition Standards. As a result, the QP has determined that further investigation of **APEC #3** is not warranted during a Phase Two ESA.

2. Introduction

GHD Limited (GHD) was retained by 2695867 Ontario Inc. to conduct a Phase One Environmental Site Assessment (ESA) of the property described as Part of Lot 35, Concession 6 in Udora, Ontario (hereinafter referred to as the Site or Property). A Site Location Map is provided on **Figure 1**.

The purpose of the Phase One ESA was to identify, through a non-intrusive investigation, the existence of any PCAs and APECs associated with the Site. PCAs and APECs are defined in O. Reg. 153/04. It is GHD's understanding that this Phase One ESA was completed in support of a future Record of Site Condition (RSC) filing on the central and southern parcels of the Site. GHD understands that the Phase One Property represents Part of Registered Plan 64 and Part of Plan 40M-2318.

Contact information for the representative of the Property owner is listed below:

Ms. Stacey Williams
HBR Planning Centre on behalf of 2695867 Ontario Inc.
71 Shannon Street
Toronto, Ontario
M6J 2E6
stacey.williams@rogers.com

2.1 Phase One ESA Property Information

The Site is located southwest of the intersection of Ravenshoe Road and Regional Road 1 in the community of Udora in the Township of Uxbridge, Ontario and was first developed for agricultural land use since the early 1800s. Other property uses previously included industrial land use. The Site is approximately 3.0 hectares (7.4 acres) in size and is currently vacant and idle. At the time of the Site reconnaissance, the Site was vacant and covered by grasses, shrubs and trees.

The Phase One Property is owned by 2695867 Ontario Inc. and the Corporation of the Township of Uxbridge and consists of 8 property identification numbers (PINs) as shown in the below table:

Property Address	Property Identification Number	Property Owner
Not Documented	26876-0156	The Corporation of the Township of Uxbridge
Not Documented	26876-0168	The Corporation of the Township of Uxbridge
Not Documented	26876-0171	The Corporation of the Township of Uxbridge
Not Documented	26876-0174	The Corporation of the Township of Uxbridge
Not Documented	26876-0176	The Corporation of the Township of Uxbridge
Not Documented	26876-0262	The Corporation of the Township of Uxbridge
Not Documented	26876-0260	2695867 Ontario Inc.
Not Documented	26876-0278	2695867 Ontario Inc.

The lands owned by The Corporation of the Township of Uxbridge form a “T” shape that separates the two parcels owned by 2695867 Ontario Inc.

3. Scope of Investigation

The Phase One ESA was conducted in accordance with the requirements of O. Reg. 153/04. The Phase One ESA was conducted by Mr. David Blair, and was reviewed by Mr. Marty Barons and Mr. Warren Croft, all of GHD. The qualifications of Mr. Blair, Mr. Barons and Mr. Croft are presented in **Appendix A**. The following tasks were conducted as part of the Phase One ESA:

- Review of an electronic environmental database search of federal, provincial, and private source databases.
- Review of available historical records including aerial photographs of the Site and surrounding area and regional geological information.
- Review of past and current Property usage and adjacent property occupancy.
- Inspection of the facilities, equipment, utility services, operations, and associated records for the Site.
- Observations of any conditions that represented potential environmental concerns.
- Review of chemical use and storage and spill/release incidents.
- Review of aboveground and underground storage tank records.
- Review of waste handling, accumulation, storage, and disposal practices.
- Review of air emissions and wastewater discharges.
- Review of equipment that potentially contains chlorofluorocarbons.
- Review of equipment that potentially contains polychlorinated biphenyls.
- Observations of potential lead-based paint.
- Observations of potential asbestos-containing materials.
- Inquiries with regulatory agencies and interviews with persons knowledgeable of the Site and Site operations.

In completing the Phase One ESA, GHD relied on information received from all parties as being accurate unless contradicted by written documentation or field observations.

The following report summarizes the information gathered by GHD during the Phase One ESA and identifies any PCAs, as defined in O. Reg. 153/04, within the Phase One ESA study area as well as any APECs associated with the Site. As required by O. Reg. 153/04, this Phase One ESA also identifies any potential contamination migration pathways and receptors associated with the Property, to the extent that the data compiled allows.

This Phase One ESA report has been prepared for the use of 2695867 Ontario Inc. and may not be relied upon by others without the written consent of GHD.

4. Records Review

4.1 General

4.1.1 Phase One ESA Study Area Determination

The Phase One ESA study area included all properties located wholly or partially within 250 metres (m) of the boundary of the Site, as required by O. Reg. 153/04. This area has been determined by GHD to be a sufficient study area since the assessment did not identify any properties with known environmental impact or high potential to impact the Site from a distance of greater than 250 m.

The properties adjacent to the Site were visually inspected, without accessing the properties, for evidence of existing or potential environmental concerns related to the Phase One ESA. GHD also visually inspected all of the Properties

within the Phase One ESA study area that were visible from the Site or surrounding streets. The following buildings or features were located on the properties surrounding the Site:

North: The Site is bounded to the north by low-rise residential structures (residential land use) and/or Ravenshoe Road (community land use), followed by the Udora Community Hall (community land use). UPI Energy, a gasoline service station, is located approximately 95 m northeast of the Site at 5 Victoria Road.

East: The Site is bounded to the east by low-rise residential structures (residential land use) and/or Regional Road 1 (community land use), followed by residential land use.

South: The Site is bounded to the south by low-rise residential structures (residential land use).

West: The Site is bounded to the west by low-rise residential structures (residential land use) and/or vacant forested lands (agricultural or other land use).

The Site representative was not aware of any environmental impacts to the Site attributable to operations conducted on adjacent lands.

4.1.2 First Developed Use Determination

Based on the discussions with the Site representative and review of historical records, the Site was first developed for agricultural purposes since the early 1800s. Based on a review of aerial photographs (see Section 4.3.1), between the 1950s and early 1970s, the Site were used as a salvage yard. The Site has remained vacant land from the 1970s to present.

4.1.3 Fire Insurance Information

Fire insurance plans assist in the identification of historical land use and commonly indicate the existence and location of aboveground and underground storage tanks, structures, improvements, and facility operations. GHD contracted ERIS to search for any available fire insurance plans that include the Phase One ESA study area, and for all available fire insurance information for the Property (i.e., inspection reports and Site plans). ERIS did not identify fire insurance plans for the Phase One Property or Study Area.

4.1.4 Chain of Title

A Chain of Title search was not completed as part of this investigation. However, GHD reviewed of a Chain of Title search completed during a previous report completed for the Site. A review of the Chain of Title indicated that the Site was owned by various private individuals or companies until 2004 and/or 2005 when Marfab Investments Inc. (precursor of Capris Investments Ltd.) become owner. In 2005, ownership of a portion of the Site was transferred to The Corporation of the Township of Uxbridge to be utilized as a road right-of-way. In 2021, ownership of the portion of the Site previously owned by Capris Investments Ltd. was transferred to 2695867 Ontario Inc.

4.1.5 Previous Environmental Reports

Two previous environmental reports were provided for review at the time of this investigation, as summarized below:

Phase One Environmental Site Assessment. 2016. WSP Canada Inc. Part of Lot 35 Concession 6, Udora, Ontario.

– A Phase One ESA report was completed in accordance with Ontario Regulation 153/04 (as amended) for the Site for Capris Investments Ltd. in December 2016. At the time of the assessment, the Site was vacant and covered with grasses, shrubs and trees;
– WSP identified a salvage yard on the Phase One Property in the 1950s through early 1970s. Visible evidence of this historic use was not observed during their site reconnaissance;

– Groundwater levels in the vicinity of the Site were identified to vary between 1.2 metres (m) and 20 metres below ground surface (mBGS) based on a review of available MECP Well Records. Based on information from a York Peel Durham Toronto (YPDT) Groundwater Management Study (Kassenaar and Wexler, 2006) reviewed by WSP, the regional groundwater flow direction is to the north-northeast towards Lake Simcoe. Based on the local topography, local groundwater flow is to the north or northeast; and,
– The Phase One ESA concluded that a Phase Two ESA would be required to assess environmental conditions on the Site prior to filing an RSC.

Phase Two Environmental Site Assessment. 2016. WSP Canada Inc. Part of Lot 35 Concession 6, Udora, Ontario.

– A Phase Two ESA report was completed in accordance with Ontario Regulation 153/04 (as amended) for the Site for Capris Investments Ltd. in December 2016;
– During the investigation, 6 boreholes and 7 test pits were advanced across the Site. Monitoring wells were installed within 3 of the 6 boreholes;
– The stratigraphy encountered at the Site consisted of a surficial layer of topsoil ranging between 0.0 to 0.8 metres below ground surface (mbgs), underlain by native soils generally consisting of sandy silt to silty sand till with organic material, clay, and trace gravel to the maximum depth of investigation. Some thin sand lenses were identified within each borehole;
– The depth to groundwater was recorded within the 3 monitoring wells and ranged from 6.11 mbgs to 12.27 mbgs. Based on the water levels recorded, the groundwater flow appeared to be in a northeastern direction;
– WSP identified the applicable Site Condition Standard for the Phase Two Property as Table 2 Full Depth Generic Site Condition Standards (SCS) in a Potable Groundwater Use Condition for Residential/Parkland/Institutional (RPI) Property Use (Table 2 SCS).
– Soil samples were submitted for analysis of metals and inorganics, petroleum hydrocarbons (PHCs), volatile organic compounds (VOCs), polycyclic hydrocarbons (PAHs), organochlorine pesticides (OCs) and polychlorinated biphenyls (PCBs). All soil samples submitted for analysis met the applicable SCS;
– Groundwater samples were submitted for analysis of metals and inorganics, PHCs, VOCs, PAHs, PCBs and OCs. All groundwater samples submitted for analysis met the applicable SCS; and,
– WSP concluded that there was no evidence of contamination within soil or groundwater at the Site.

4.2 Regulatory Review

No concerns, complaints, notices of violation, or directives of an environmental nature issued against the Site by federal, provincial, or municipal environmental regulatory agencies have been disclosed to GHD.

A Freedom of Information (FOI) request was submitted to the MECP, requesting information pertaining to environmental incidents, orders, offences, spills, discharges of contaminants, or inspections for the Phase One Property. The MECP response (File # A-2022-06991) was received on October 19, 2022, which stated that no records were located in pursuant to GHD's request

The Technical Standards and Safety Authority (TSSA) was contacted by GHD and asked to provide information concerning any licensed retail fuel outlets or registered private fuel outlets located at the Site. TSSA personnel provided e-mail correspondence to GHD indicating that their records did not identify the presence of any licensed or registered underground storage tanks (USTs) at the Site.

A copy of the correspondence with the regulatory agencies is included in **Appendix B**.

4.2.1 Environmental Databases Search

GHD contracted Environmental Risk Information Services Ltd. (ERIS) to conduct a search of available federal, provincial, and private environmental databases. Based on the location of the Site, the databases search was

completed to assist in the identification of environmental conditions at the Site and on adjacent properties. 7 records were identified in the environmental databases to be associated with the Site. 106 records were identified to be associated with properties located within the Phase One ESA study area. The complete database search report, which also identifies limitations associated with this information, is included in **Appendix C**.

Based on the review of the information provided in the environmental databases search report, PCAs identified within the Phase One ESA study are summarized in the table below:

Property Address(es)	Referenced Database(s)	PCA(s), in accordance with O. Reg. 153/04	PCA(s) contributing to an APEC at the Property (Yes/No/Rationale)
5 Victoria Road – Based on the Site reconnaissance and ERIS report, the property is a gasoline service station	ERIS DTNK, FST, FSTH, PRT	PCA 28 – Gasoline and Associated Products Storage in Fixed Tanks	No – Due to the distance from Site and the inferred groundwater flow direction, this record is not anticipated to have affected the environmental quality of Site and is therefore not contributing to an APEC.

4.3 Physical Setting

Review of historical records indicated that the Site is located in the community of Udora in the Township of Uxbridge, Ontario that was first developed for agricultural purposes since the early 1800s. Other property uses previously included industrial land use. The Site is approximately 3.0 hectares (7.4 acres) in size and is currently vacant and idle.

4.3.1 Aerial Photographs

Aerial photographs were reviewed to generally document the development of the Site and properties in the vicinity of the Site, and to identify the existence of any significant actual or potential areas of environmental impairment at the Site. GHD reviewed aerial photographs of the Site and surrounding area identified within previous reports completed for the Site **(Appendix D)** the years 1927, 1959, 1966, 1976, 1981, 1999, 2005, 2009, 2013 and 2015. These photographs were suitable for use in this Phase One ESA based on the quality of the aerial imagery available for review. The earliest available aerial photograph identified for the Site was dated 1927. A summary of the review of aerial photographs and aerial images is provided below:

1927 Aerial Photograph (1:5,000): Review of the 1927 aerial photograph indicates that the Site and Study Area were primarily used for agricultural purposes. A field crop was planted across the Site and there were no orchards present. Ravenshoe Road, Victoria Road and Regional Road 1 appeared in similar locations to present day. Residential structures were located east of the Site along Regional Road 1. A tributary of the Pefferlaw River was located north of the Site.

1959 Aerial Photograph (1:5,000): Review of the 1959 aerial photograph indicates that the central portion of the Site appeared to be consistent with use as a salvage yard. Former agricultural land west of the Site appeared to have naturalized vegetation. Several properties along Victoria Road, Ravenshoe Road and Regional Road 1 appeared to be redeveloped for residential use.

1966 Aerial Photograph (1:5,000): Review of the 1966 aerial photograph indicates that the central and southern portions of the Site appeared to be consistent with use as a salvage yard. The Study Area appeared similar to the 1959 aerial photograph. A building had been constructed at the northeast corner of Ravenshoe Road and Victoria Road that appeared to be similar in size and orientation to the current gasoline service station building on that property.

1976 Aerial Photograph (1:5,000): Review of the 1976 aerial photograph indicates that the Site and Study Area appeared similar to the 1966 aerial photograph. The materials previously visible within the salvage yard were no longer clearly visible, although the roadways within the former salvage yard remained visible.

1981 Aerial Photograph (1:5,000): Review of the 1981 aerial photograph indicates that the Site appeared to be vacant. The roadways identified in the 1976 aerial photograph were no longer visible. The Study Area appeared similar to the 1976 aerial photograph.

1999 Aerial Photograph (1:5,000): Review of the 1999 aerial photograph indicates that the Site and Study Area appeared similar to the 1981 aerial photograph.

2005 Aerial Photograph (1:5,000): Review of the 2005 aerial photograph indicates that the Site and Study Area appeared similar to the 1999 aerial photograph.

2009 Aerial Photograph (1:5,000): Review of the 2009 aerial photograph indicates that the Site appeared similar to the 2005 aerial photograph. A residential subdivision was constructed south adjacent to the Site.

2013 Aerial Photograph (1:5,000): Review of the 2013 aerial photograph indicates that the Site and Study Area appeared similar to the 2009 aerial photograph.

2015 Aerial Photograph (1:5,000): Review of the 2015 aerial photograph indicates that the Site and Study Area appeared similar to the 2013 aerial photograph.

Based on the review of the aerial photographs and images, the following PCAs were identified to be associated with the Site or with properties located within the Phase One ESA study area.

– No information was available regarding the crops historically grown at the Site, or to exclude the potential for pesticides use as part of historic agricultural practices. Application of organic, inorganic and synthetic pesticides were common practice in Ontario upon until the late 1900's. No information was available regarding historic agricultural practices, or the types/quantifies of any pesticides used at the Site. For these reasons, the potential application of pesticides has been identified as a PCA at the Site (Pesticides [including Herbicides, Fungicides and Anti-Fouling Agents] Manufacturing, Processing, Bulk Storage and Large-Scale Applications). The potential historic application of pesticides has been identified as **APEC #1**.
– A salvage yard was identified on the Site between the 1950s and early 1970s. No information was available regarding historical chemical or waste material handling and storage. The former salvage yard was identified as a PCA (#49 – Salvage Yard, Including Automobile Wrecking) in accordance with O. Reg. 153/04. The northern portion of the Site was previously investigated by WSP in 2016 for environmental impacts from the salvage yard. No impacts in soil and groundwater to the northern portion of the Site were found. A Record of Site Condition was acknowledged by the MECP for the northern portion of the Site. The former salvage yard was identified as a PCA (#49 – Salvage Yard, Including Automobile Wrecking) in accordance with O. Reg. 153/04. As such, the central portion of the Site was identified as **APEC #2**.

Copies of the aerial photographs obtained from ERIS are provided in **Appendix D**.

4.3.2 Topography, Hydrology, Geology

The elevation of the Site ranges from approximately 243 to 260 metres above mean sea level (mAMSL)[1]. Regional topography generally slopes to the north towards a tributary of the Pefferlaw River and Lake Simcoe, located approximately 400 m and 8.6 kilometres (km) north of Site, respectfully.

The northern portion of the Site is located in the physiographic region known as the Sand Plains, while the southern portion of the Site is located in the physiographic region known as the Drumlinized Till Plains[2]. A review of published quaternary geologic mapping for the area of the Site indicates that the overburden at the Site consists predominantly of stone-poor sandy silt to silty sand textured till on Paleozoic terrain[3]. Beneath the overburden deposits is bedrock consisting of limestone, dolostone, shale, arkose and sandstone of the Ottawa Group, Simcoe Group and Shadow

[1] Natural Resources Canada [map]. "The Atlas of Canada - Toporama", governed by version 2.3 of the Open Government License – Canada. November 27, 2020. http://atlas.gc.ca/toporama/en/index.html
[2] Chapman, L. J., and D. F., Putnam (1984), "The Physiography of Southern Ontario", Ontario Geological Survey.

Lake Formation[3]. Based on a review of available MECP well records, bedrock is expected to be encountered at between approximately 33.8 and 43.0 metres below ground surface (mbgs).

Topographic information for the Phase One ESA study area is included on **Figure 1**. A discussion of water bodies located within the vicinity of the Site is provided in Section 4.3.4. Well records identified within the Phase One ESA study area are discussed in Section 4.3.5.

4.3.3 Fill Materials

GHD did not observe fill materials at the time of the Site inspection. The Site representative was not aware of the presence of any imported fill materials at the Site.

The Phase Two ESA completed by WSP, did not note any fill at the Site within the borehole logs.

4.3.4 Water Bodies and Areas of Natural Significance

No water bodies are located on the Site. The closest water body to the Site is a tributary of the Pefferlaw River, located approximately 400 m north of Site.

In accordance with O. Reg. 153/04, an "area of natural significance" is defined as any of the following:

1. An area reserved or set apart as a provincial park or conservation reserve under the Provincial Parks and Conservation Reserves Act, 2006.
2. An area of natural and scientific interest (life science or earth science) identified by the Ministry of Natural Resources and Forestry (MNRF) as having provincial significance.
3. A wetland identified by the MNRF as having provincial significance.
4. An area designated by a municipality in its official plan as environmentally significant, however expressed, including designations of areas as environmentally sensitive, as being of environmental concern and as being ecologically significant.
5. An area designated as an escarpment natural area or an escarpment protection area by the Niagara Escarpment Plan under the Niagara Escarpment Planning and Development Act.
6. An area identified by the MNRF as significant habitat of a threatened or endangered species.
7. An area which is habitat of a species that is classified under Section 7 of the Endangered Species Act, 2007 as a threatened or endangered species.
8. Property within an area designated as a natural core area or natural linkage area within the area to which the Oak Ridges Moraine Conservation Plan under the Oak Ridges Moraine Conservation Act, 2001 applies.
9. An area set apart as a wilderness area under the Wilderness Areas Act.

A summary of GHD's review is provided below:

1. The Site is not an area reserved or set apart as a provincial park or conservation reserve under the Provincial Parks and Conservation Reserves Act, 2006.
2. The Site is not an area of natural and scientific interest (life science or earth science) identified by the MNRF as having provincial significance. GHD reviewed the MNRF's – "Natural Heritage Information Centre" database to identify areas registered as Areas of Natural or Scientific Interest (ANSI). There were no ANSI's identified within a 1-km radius of the Site.
3. The Site is not a wetland identified by the MNRF as having provincial significance.
4. The Site is not an area designated by a municipality in its official plan as environmentally significant.
5. The Site is not an area designated as an escarpment natural area or an escarpment protection area by the Niagara Escarpment Plan under the Niagara Escarpment Planning and Development Act.

[3] "Bedrock Geology of Ontario" [map]. Scale 1:250,000. OGS Earth Geoscience Data [computer files]. Sudbury, Ontario: Ontario Geological Survey & Ministry of Northern Development and Mines, 2010.

6. The Site is an area identified by the MNRF as significant habitat of a threatened or endangered species. GHD conducted a search to determine if threatened or endangered species are present within or adjacent to the Site. According to the Committee on the Status of Endangered Wildlife in Canada (COSWIC), Species at Risk in Ontario (SARO), and MNRF, the following species were listed as threatened and/or endangered within the Phase One ESA study area:
   - Eastern Meadowlark (bird); and,
   - Bobolink (bird).

   Review of information pertaining to the habitats of the above-noted species indicated that Site features may be conducive to their habitats.
7. Based on the review of information pertaining to the habitats of aforementioned threatened and/or endangered species, the Site may be an area which is conducive to the habitat of Northern Bobwhite and/or Bobolink, which are classified under Section 7 of the Endangered Species Act, 2007 as threatened or endangered species. No information was available to confirm if confirmed habitat of these species is present on the Site.
8. The Site is not a property within an area designated as a natural core area or natural linkage area within the area to which the Oak Ridges Moraine Conservation Plan under the Oak Ridges Moraine Conservation Act, 2001 applies.
9. The Site is not an area set apart as a wilderness area under the Wilderness Areas Act.

Based on the above information and the definition of area of natural significance provided in O. Reg. 153/04, GHD did not identify any information that would confirm that the Site may be considered an area of natural significance. An ecological investigation would be required to confirm if habitat of threatened and/or endangered species is present on the Site.

4.3.5 Well Records

A search of the MECP Water Well Information System (WWIS) database was conducted as a component of the environmental databases search outlined in Section 4.2.2. 7 records were identified in the WWIS database to be associated with the Site. Eighty-eight (88) records were identified in the WWIS database to be associated with wells installed within the Phase One ESA study area. The records were associated with monitoring wells and water supply wells. Additional information regarding the well records identified on the Site and within the Phase One ESA study area is provided in **Appendix C**.

4.3.6 Site Operating Records

No Site Operating Records were identified for the Site.

5. Interviews

As part of the Phase One ESA, GHD interviewed the following personnel:

Facility Contact	Position	Period Familiar with the Site
Ms. Stacey Williams	Planner	9 years

The above-listed person was identified to be the most knowledgeable regarding the historical and current use of the Property.

The interview completed with a representative of the property owner was focused on the historical and current use of the Property, and the topics listed in Sections 13 and 14 of Schedule D of O. Reg. 153/04. Relevant information provided to GHD by those interviewed has been summarized in the following sections.

6. Site Reconnaissance

6.1 General Requirements

On September 23, 2022, Mr. David Blair of GHD completed a Site inspection of the Property. The Site inspection was completed between approximately 10:00 a.m. and 12:00 p.m. Weather conditions during the Site visit were sunny with an ambient air temperature of approximately 13°C.

The Site reconnaissance included a walk-through of the Property to confirm the current Site conditions and identify any current land uses, which may have or may cause actual and/or potential environmental impacts to the Site. Adjoining and neighbouring properties were observed from the Site and public access ways. Photographs of the Site are included in **Appendix E**.

Mr. Blair completed a telephone interview with Ms. Williams on September 22, 2022.

6.2 Specific Observations at Phase One ESA Property

6.2.1 Building and Property

The Site is approximately 3.0 hectares (7.4 acres) in size and is vacant and idle. The exterior surfaces of the Site primarily consist of grassy fields, shrubs and trees. No water bodies are located on the Site.

6.2.2 Current Site Operations

Based on discussions with the Site representative and the Site reconnaissance, the Site is currently vacant.

6.2.3 Historical Site Operations

Based on a review of historical records, the Site was historically utilized for agricultural crop land purposes until the 1950s. A salvage yard was identified on the Site between the 1950s and early 1970s. No records were available for review associated with the former salvage yard during this investigation. The Site has remained vacant from the 1970s until present.

6.2.4 Utility Services

GHD did not identify buried utilities at the Site. No back-up generators are located on the Site.

The Site is not serviced with municipally-supplied potable water or storm and sanitary sewer services. The Site representative was not aware of the past presence of any septic systems at the Site. GHD did not observe evidence of any active or abandoned septic systems at the Site during the Site inspection.

6.2.5 Underground Storage Tanks (USTs)

Based on discussions with the Site representative, there are no active or inactive USTs located at the Site; and to the best of their knowledge, no USTs have historically been owned or operated at the Site. At the time of the Site inspection, no visual evidence (e.g., vent pipes, fill pipes, etc.) suggesting the presence of on-Site USTs was observed by GHD.

6.2.6 Aboveground Storage Tanks (ASTs)

Based on discussions with the Site representative and GHD observations, no ASTs are currently operated at the Site. Facility personnel reported that no ASTs have ever been operated at the Site, to their knowledge.

6.2.7 Floor Drains, Pits, and Sumps

Based on discussions with the Site representative and observations made by GHD during the Site inspection, floor drains, pits and or sumps are not located on the Site.

6.2.8 Wastewater/Sewers

Based on discussions with the Site representative and GHD's observations, wastewater is not generated at the Site.

6.2.9 Stormwater/Surface Water

Stormwater generated at the Site is directed by surface grading towards Property boundaries and off-Site roadside ditches located along Ravenshoe Road and Regional Road 1. The Site representative was not aware of any stormwater quality concerns associated with the Site. No sources of adverse impact to stormwater quality were observed by GHD during the Site inspection.

At the time of the Site inspection, no visual evidence of impact from surface water run-on from the adjacent properties was observed by GHD.

6.3 Enhanced Investigation Property

The Phase One ESA property is considered to be an Enhanced Investigation property if it is currently used or has ever been used in whole or in part for industrial use, or commercial uses including a garage, a bulk liquid dispensing facility such as a gasoline station, or for the operation of dry-cleaning equipment. Based on records reviewed during this investigation, the Site was utilized as a salvage yard between the 1950s and early 1970s, and is therefore an enhanced investigation property. However, no records were identified regarding the use of the Site as a salvage yard.

6.3.1 Asbestos-Containing Materials (ACM)

No structures or potential ACM are located on the Site. The Site representative was not aware of ACM being present at the Site, and reported that, to her knowledge, no asbestos surveys or abatement projects have been conducted at the Site.

6.3.2 Polychlorinated Biphenyls (PCBs)

According to the Site representative, to her knowledge no PCB-containing equipment is currently used, stored, or handled at the Site. At the time of the Site reconnaissance, GHD did not observe any evidence of on-Site PCBs. The Site representative was not aware of PCBs being present at the Site.

6.3.3 Solid Waste/Recyclable Materials

No solid wastes or recyclables are generated or stored on the Site. No evidence of on-Site disposal of solid waste was observed by GHD during the Site reconnaissance. As previously identified, the Site was historically utilized as a salvage yard.

6.3.4 Chemical and Raw Material Use and Storage

No evidence of raw materials and chemical use and storage areas was observed by GHD during the Site reconnaissance. The Site representative indicated that she was unaware of any chemical use or storage on Site.

6.3.5 Subject Waste/Hazardous Waste

Based on the information provided by the Site representative, no Subject or Hazardous Wastes are currently generated at the Site. No visual evidence of on-Site generation or disposal of Subject or Hazardous Wastes was observed by GHD at the time of the Site reconnaissance. No information was available regarding waste handling related to the former salvage yard.

6.3.6 Chemical Spills/Releases

At the time of the Site reconnaissance, GHD did not observe visual evidence of chemical spills or releases at the Site. No evidence of staining or distressed vegetation was observed during the Site reconnaissance. No records were identified in the SPL database associated with the Site.

6.3.7 Lead-Based Paint

The amount of lead in interior paint has been regulated since 1976 through Health Canada's Hazardous Products Act. No painted surfaces are located on the Site.

6.3.8 Chlorofluorocarbons (CFCs)

Based on discussions with the Site representative and observations made by GHD during the Site reconnaissance, no CFC containing equipment is used on the Site.

6.3.9 Air Emissions

Based on GHD observations and discussions with the Site representative, there are no air emissions sources present at the Site.

6.3.10 Ionizing Radiation

The Site representative reported that no commercial sources of ionizing radiation (e.g., fill level controllers) have been located at the Site. At the time of the Site reconnaissance, no sources of ionizing radiation were observed by GHD at the Site.

Radon gas forms from the natural decay of uranium and radium in soil. Radon gas is a radioactive element that can be harmful if high concentrations accumulate in interior spaces and are inhaled. Based on the WSP Phase Two ESA report concentrations of uranium were found at the Site below the applicable Site Condition Standards. Radon gas is not considered an environmental concern for the Site. The Site representative also reported that, to her knowledge, a radon gas survey has not been conducted at the Site.

6.4 Written Description of Investigation

The Phase One ESA included a records review, interviews with Site personnel, a Site reconnaissance, and a review and evaluation of the information obtained during the Phase One ESA. The Site reconnaissance included a walk-through of the Property to confirm the current Site conditions and identify any current land uses, which may have or may cause actual and/or potential environmental impacts to the Site. Adjoining and neighbouring properties were observed from the Site and public access ways.

The findings from the assessment carried out pursuant to Sections 13 and 14 of Schedule D of O. Reg. 153/04, as amended, were previously discussed in Section 6.0.

7. Review and Evaluation of Information

7.1 Current and Past Uses

Based on a records review and the information provided by the Site representative, the Site is currently owned by 2695867 Ontario Inc. Review of historical records indicated that the Site was utilized for agricultural purposes from the early 1800s to the 1950s when it was redeveloped into a salvage yard. The Site has been vacant from the 1970s to present.

A summary of the current and past uses of the Site is provided below:

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
1808 – 1950s	Various private owners	Agricultural	Agricultural or Other Use	Based on a review of the County Atlas, records and aerials photographs, the Site was utilized for agricultural purposes.
1950s – 1970s	Various private owners	Salvage yard	Industrial Use	Based on a review of records and aerials photographs, the Site was utilized as a salvage yard.
1970s – mid-2000s	Various private owners	Vacant	Agricultural or Other Use	Based on a review of records and aerials photographs, the Site was vacant.
Mid-2000s - 2021	Marfab Investments Inc. (Capris Investments Ltd.) and The Corporation of the Township of Uxbridge	Vacant	Agricultural or Other Use	Based on a review of records and aerials photographs, the Site was vacant. A portion of the Site was sold to The Corporation of the Township of Uxbridge for use as a roadway.
2021 - present	2695867 Ontario Inc. and The Corporation of the Township of Uxbridge	Vacant	Agricultural or Other Use	Based on a review of records and aerials photographs, the Site was vacant.

7.2 Potentially Contaminating Activity

The MECP provides a list of PCAs in Schedule D of O. Reg. 153/04, under the Environmental Protection Act. PCAs that have been identified to be on, in, or under the Phase One ESA Property, or located within the Phase One ESA study area and having the potential to contribute to an APEC are presented in Section 7.3.

7.3 Areas of Potential Environmental Concern (APEC)

The following APECs have been identified by the Phase One ESA records review, interviews, and Site reconnaissance and are summarized in the table below and **Figure 3**. This matrix is used to list and describe each PCA at the Property and each PCA in the Phase One ESA Study Area that may be contributing to an APEC at the Property.

Table of Areas of Potential Environmental Concern
Part of Lot 35, Concession 6
Udora, Ontario
[Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04]

Area of Potential Environmental Concern[1]	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity[2]	Location of PCA (on-site or off-site)	Contaminants of Potential Concern[3]	Media Potentially Impacted (Ground Water, Soil and/or Sediment)
APEC #1 – Potential Former Pesticide Use	Central and Southern portion of the Site	40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	On-Site	Metals, OCs	Soil & Groundwater
APEC #2 – Former Salvage Yard	Central and Southern portion of the Site	49. Salvage Yard, including Automobile Wrecking	On-Site	Metals, As, Sb, Se, Cr (VI), Hg, PHCs, VOCs, PAHs	Soil & Groundwater
APEC #3 – Application of De-icing Agents	Land adjacent to Concession Road 7 and Birdie Smith Court	A. Application of De-icing Agents	Off-Site	Electrical conductivity, SAR, Na, Cl-	Soil & Groundwater

Notes:

1 Area of Potential Environmental Concern means the area on, in or under a phase one property where one or more contaminants are potentially present, as determined through the phase one environmental site assessment, including through:

(a) Identification of past or present uses on, in or under the phase one property.

(b) Identification of potentially contaminating activity.

2 Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a phase one study area.

3 When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the "Protocol for Analytical Methods in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011, as specified below:

Acid base neutral extractable (ABNs)	Petroleum hydrocarbons (PHCs)	Benzene, toluene, ethylbenzene and xylenes (BTEX)	Boron, hot water soluble (B-HWS)	Mercury (Hg)
Chlorophenols (CPs)	Polychlorinated biphenyls (PCBs)	Calcium (Ca), magnesium (Mg)	Chloride (Cl^-)	Methyl Mercury
1,4-Dioxane	Polycyclic aromatic hydrocarbons (PAHs)	Metals	Cyanide (CN^-)	high pH
Dioxins/Furans, PCDDs/PCDFs	Trihalomethanes (THMs)	Arsenic (As), antimony (Sb), selenium (Se)	Electrical conductivity (EC)	low pH
Organochlorine pesticides (OCs)	Volatile organic compounds (VOCs)	Sodium (Na)	Chromium (hexavalent) [Cr (VI)]	Sodium adsorption ratio (SAR)

7.4 Phase One Conceptual Site Model

The Site is located in the Town of Udora, Ontario and has been developed for agricultural or industrial purposes since the early 1800s. The Site is approximately 3.0 hectares (7.4 acres) in size and is currently vacant. The Site is generally a grassy open area.

The elevation of the Site ranges from approximately 243 to 260 mAMSL. Regional topography generally slopes to the north towards a tributary of the Pefferlaw River and Lake Simcoe, located approximately 400 m and 8.6 km north of Site, respectfully. The northern portion of the Site is located in the physiographic region known as the Sand Plains, while the southern portion of the Site is located in the physiographic region known as the Drumlinized Till Plains. A review of published quaternary geologic mapping for the area of the Site indicates that the overburden at the Site consists predominantly of stone-poor sandy silt to silty sand textured till on Paleozoic terrain. Beneath the overburden deposits is bedrock consisting of limestone, dolostone, shale, arkose and sandstone of the Ottawa Group, Simcoe Group and Shadow Lake Formation. Based on a review of available MECP well records, bedrock is expected to be encountered at between approximately 33.8 and 43.0 mbgs.

The Site may be an area of natural significance, as defined in O. Reg. 153/04. An ecological investigation may be required to confirm the presence of threatened and/or endangered species.

Based on discussions with the Site representative and the Site reconnaissance, underground utilities are not present beneath the Site. To the best of GHD's knowledge no underground utilities are present beneath the Property.

The following APECs associated with the Site were identified by the Phase One ESA records review, interviews, and Site reconnaissance:

APEC	Location of the APEC on Phase One Property	PCA(s)	Location of PCA (on-site or off-site)
APEC #1 – Potential Former Pesticide Use	Central and Southern portion of the Site	40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	On-Site
APEC #2 – Former Salvage Yard	Central and Southern portion of the Site	49. Salvage Yard, including Automobile Wrecking	On-Site
APEC #3 – Application of De-icing Agents	Land adjacent to Concession Road 7 and Birdie Smith Court	A. Application of De-icing Agents	Off-Site

Road salt has been applied along adjacent/nearby roadways during winter months for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both. Bulk salt has not been stored at the Site. The application of road salt in the vicinity of the Site has the potential to result in elevated sodium adsorption ratio (SAR) and electrical conductivity (EC) in soil, and sodium and chloride in groundwater, and would have the potential to contribute to an APEC at the Site and was identified as **APEC #3**. However, in accordance with paragraph 1 of Section 49.1 of O. Reg. 153/04, any potential on-Site exceedances of SAR, EC, sodium, or chloride associated with the application of the road salt would be deemed as having met the applicable Site Condition Standards. As a result, the QP has determined that further investigation of **APEC #3** is not warranted during a Phase Two ESA.

Off-Site PCAs were identified to be associated with properties located within the Phase One ESA study area (as noted on **Figure 2**) that were not interpreted to have the potential to contribute to an APEC at the Site. A summary of the off-Site PCAs that did not result in an APEC at the Site is provided below:

Property Address(es)	PCA(s), in accordance with O. Reg. 153/04	PCA(s) contributing to an APEC at the Property (Yes/No)	Rationale
5 Victoria Road – Based on the Site reconnaissance and ERIS report, the property is a gasoline service station	PCA 28 – Gasoline and Associated Products Storage in Fixed Tanks	No	Due to the distance from Site and the inferred groundwater flow direction, this record is not anticipated to have affected the environmental quality of Site and is therefore not contributing to an APEC.

Based on the results of the Phase One ESA, the contaminants of concern at the Site include metals and inorganics, PHCs, VOCs, PAHs, and OCs.

The Phase One ESA Conceptual Site Model for the Site and the Phase One ESA study area are shown on **Figure 2**.

8. Conclusions

Based on the results of the Phase One ESA, including the Site inspection, information provided by Site representatives ands regulatory agencies, documents reviewed, the review of Site history, and review of information from the regulatory agencies, the following APECs were identified to be associated with the Site:

- **APEC #1 – Potential Historic Application of Pesticides:** No information was available regarding the crops historically grown at the Site, or to exclude the potential for pesticides use as part of historic agricultural practices. Application of organic, inorganic and synthetic pesticides were common practice in Ontario upon until the late 1900's. No information was available regarding historic agricultural practices, or the types/quantifies of any pesticides used at the Site. For these reasons, the potential application of pesticides has been identified as a PCA at the Site (Pesticides [including Herbicides, Fungicides and Anti-Fouling Agents] Manufacturing, Processing, Bulk Storage and Large-Scale Applications). The northern portion of the Site was previously investigated by WSP in 2016 for environmental impacts from the application of pesticides. No impacts in soil and groundwater to the northern portion of the Site were found. A Record of Site Condition was acknowledged by the MECP for the northern portion of the Site As such, the central and southern portion of the Site was identified as **APEC #1**.
- **APEC #2 – Former Salvage Yard:** A salvage yard was identified on the Site between the 1950s and early 1970s. No information was available regarding historical chemical or waste material handling and storage. The former salvage yard was identified as a PCA (#49 – Salvage Yard, Including Automobile Wrecking) in accordance with O. Reg. 153/04. The northern portion of the Site was previously investigated by WSP in 2016 for environmental impacts from the salvage yard. No impacts in soil and groundwater to the northern portion of the Site were found. A Record of Site Condition was acknowledged by the MECP for the northern portion of the Site. The former salvage yard was identified as a PCA (#49 – Salvage Yard, Including Automobile Wrecking) in accordance with O. Reg. 153/04. As such, the central and southern portion of the Site was identified as **APEC #2**.
- **APEC #3 – Road Salt Application:** Road salt has been applied along adjacent/nearby roadways during winter months for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both. Bulk salt has not been stored at the Site. The application of road salt in the vicinity of the Site has the potential to result in elevated sodium adsorption ratio (SAR) and electrical conductivity (EC) in soil, and sodium and chloride in groundwater, and would have the potential to contribute to an APEC at the Site and was identified as **APEC #3**. However, in accordance with paragraph 1 of Section 49.1 of O. Reg. 153/04, any potential on-Site exceedances of SAR, EC, sodium, or chloride associated with the application of the road salt would be deemed as having met the applicable Site Condition Standards. As a result, the QP has determined that further investigation of **APEC #3** is not warranted during a Phase Two ESA.

8.1 Requirement for Phase Two ESA before RSC can be Submitted

Based on the information obtained in completing the Phase One ESA, a Phase Two ESA will be required before an RSC can be filed with the MECP.

All of Which is Respectfully Submitted,

GHD

David Blair, M.Sc.

Marty Barons, P.Eng., QP_{ESA}

Warren Croft, P.Eng., QP_{ESA}

Project Personnel Curricula Vitae

David Blair M.Sc.

Environmental Scientist

Location

Toronto, Ontario, Canada

Experience

3 years

Qualifications/Accreditations

– Honours Bachelor's Degree, Physical Geography and Biology, McGill University, 2015
– Master of Science, Bioresource Engineering (Hydrology & Water Resources), McGill University, 2017

Key technical skills

– Phase One and Two ESAs
– Soil and Groundwater Remediation
– Excess Soil Management
– Soil Vapour Investigations

Relevant experience summary

David Blair is an Environmental Scientist with the Contaminated Site Assessment & Remediation Group in GHD's Toronto office. David has 3 years of experience as an environmental consultant and contractor. David has experience conducting Phase One and Two Environmental Site Assessments (ESAs) on a variety of residential, commercial, and industrial properties. He has experience in field supervision and collection of soil and groundwater samples. Additional technical skills include data analysis and technical report writing.

David's graduate research focused on peatland hydrology and ecology. He has experience conducting environmental investigations and research in diverse locations across Canada including the Hudson Bay Lowlands, Prince Edward Island and Eastern Quebec.

Environmental Site Assessments (ESAs)

Former Orangeville Rail Contaminant Overview Study

Region of Peel | Peel Region, Ontario, Canada | February – May 2020

Environmental Technician and report author for the Contaminant Overview Study for the future development of the Former Orangeville Rail to a recreational trail. This work was completed as part of the pre-purchase due diligence works prior to the acquisition of the properties. The entire 55.4-kilometre rail corridor was investigated for potential environmental contaminants of concerns as part of the study. The final report provided our recommendations for the next phase of the project to conduct focused Phase Two ESAs on the highest risk sections of the rail corridor.

Scarborough Subway Extension (SSE)

Metrolinx | Toronto, Ontario, Canada | $94,000 | June 2020 – October 2021

Report author responsible for preparation of various Phase One ESA reports. The project mandate was to provide Phase One ESAs for sixty-two (62) properties along the SSE project area (McCowan Alignment: from Eglinton/Midland to Sheppard/McCowan).

Sterling Road Developments

Castlepoint Greybrook Sterling Inc. | Toronto, Ontario, Canada | $500,000+ | April 2019 – October 2021

Environmental technician and report author responsible for field activities associated with the execution of soil and groundwater investigations, followed by remediation and confirmatory sampling and/or Risk Assessments in support of RSC Filing, and Phase One and Phase Two reporting. The project mandate was to provide environmental, geotechnical and hydrogeological services including contaminant monitoring, remediation,

air-quality sampling and Record of Site Conditions (RSC) for select commercial and residential redevelopment of several parcels of land formerly owned and operated as an aluminium manufacturing facility.

City of Toronto Modular Homes Hydrogeological Assessment

City of Toronto | Toronto, Ontario, Canada | February 2021 – June 2021

Environmental technician responsible for activities associated with the hydrogeological field investigation including hydraulic conductivity assessment, and background water quality assessment.

Phase One and Two Environmental Site Assessments, Various Sites

Region of Peel | Peel Region | Ontario, Canada | January 2019 – October 2021

Responsibilities included environmental soil and groundwater investigations, soil characterization projects and soil remediation for various projects for the Region of Peel. Responsibilities includes the completion of field work as well as report preparation, coordination with field staff, and consultation with the client.

Environmental Soil/Sub Slab Vapour and Indoor Air Monitoring

Tribal-Castlepoint-Kerbel | Toronto, Ontario, Canada | April 2019 – October 2021

Environmental Technician responsible for quarterly collection and submission of soil vapour, sub slab vapour and indoor air samples. The project mandate was to oversee on-going environmental monitoring activities in accordance with the Amendment to the CPU and the RMP. Monitoring was to ensure the sub-slab vapour system was in good working order, and that indoor air vapour samples were not affected from off gassing of any impacted soil.

266 – 284 King Street West Development Site

GG Duncan Inc. | Toronto, Ontario, Canada | November 2020 – May 2021

Environmental technician and report author responsible for field activities associated with the execution of soil and groundwater investigations in support of RSC Filing, and Phase One and Phase Two reporting. The project mandate was to provide environmental, geotechnical and hydrogeological services for commercial and residential redevelopment of several parcels of land.

Career history

2021 - present	GHD, Environmental Scientist, Toronto, ON
2019 - 2021	WSP, Environmental Technician, Toronto, ON

Marty Barons P.ENG., QP$_{ESA}$

Sr. Environmental Engineer

Location

Toronto, ON, Canada

Experience

18 years

Qualifications/Accreditations

– B.A.Sc., Environmental Engineering, University of Waterloo, 2003

Key technical skills

– Phase One & Two ESA, Soil & Groundwater Remediation
– CPU Management
– RSC filing
– Excess Soil Management

Memberships

– Professional Engineers of Ontario, 2008

Relevant experience summary

Marty a Senior Environmental Engineer with the Contaminated Site Assessment & Remediation Group in GHD's Toronto office. Marty is a Professional Engineer licensed in Ontario with 18 years of experience as an environmental consultant and contractor. Marty is experienced in conducting Phase I and II ESAs; Risk Management Measure; project management; peer reviewing and Record of Site Condition filing. As a Qualified Person (ESA), Marty has extensive experience designing Risk Management Measures for Risk Assessment and overseeing their construction including vapour barrier systems, roadway designs and parkland spaces. He has significant experience planning, conducting and overseeing large projects, such as the Port Lands Flood Protection and Enabling Infrastructure and West Don Lands for Waterfront Toronto.

Project experience – Excess Soil Management (O. Reg. 406/19)

Liverpool Forcemain

Qualified Person $_{ESA}$ |
Region of Durham | Pickering, Ontario, Canada | Aug 2021 - present

Qualified Person to assist with prepare the planning documentation in accordance with O. Reg. 406/19 (Assessment of Past Uses, Sampling and Analysis Plan, and Soil Characterization reports) for forcemain to be installed in Pickering. Preparation of technical specifications for excess soils to be consistent with O. Reg. 406/19.

Pit Rehabilitation - Excess Soil Importation

Qualified Person $_{ESA}$ |
Dufferin Aggregates | Ontario, Canada | Aug 2021 - present

Qualified Person to assist with prepare the planning documentation in accordance with O. Reg. 406/19 (Assessment of Past Uses, Sampling and Analysis Plan, and Soil Characterization reports) for forcemain to be installed in Pickering. Preparation of technical specifications for excess soils to be consistent with O. Reg. 406/19.

Bowmanville Zone 1 Feedermain

Qualified Person $_{ESA}$ |
Region of Durham | Ontario, Canada | Aug 2021 - present

Qualified Person for the preparation of the planning documentation in accordance with O. Reg 406/19 (Assessment of Past Uses, Sampling and Analysis Plan, Soil Characterization and soil characterization in support of the design of the feedermain and excess soil to be generated.

Culvert Replacement Program

Qualified Person $_{ESA}$ |
Region of Peel | Ontario, Canada | Aug 2021 - present

Qualified Person for the preparation of planning documentation in accordance with O. Reg 406/19 (Assessment of Past Uses, Sampling and Analysis Plan) and soil characterization in support of the design of the replacement of four culverts and excess soil to be generated.

Reconstruction of Taunton Road from Townline Road to Enfield Road

Qualified Person $_{ESA}$ |
Region of Durham | Clarington, Ontario, Canada | Aug 2021 - present

Qualified Person for the preparation of planning documentation (Assessment of Past Uses and sampling and analysis plan) in accordance with O. Reg. 406/19 plan in support of the design of the road replacement and excess soil to be generated. Soil characterization activities will be undertaken in early 2022.

Replacement of Whites Bridge on Columbus Road

Qualified Person $_{ESA}$ |
Town of Whitby | Whitby, Ontario, Canada | Aug 2021 - present

Qualified Person for the preparation of planning documentation in accordance with O. Reg 406/19 (Assessment of Past Uses, Sampling and Analysis Plan) and soil characterization in support of the design of the replacement of Whites Bridge and excess soil to be generated.

Courtice Trunk Sewer Phases 4, 5 and 6

Sr. Engineer – QP$_{ESA}$ |
Region of Durham | Courtice, Ontario, Canada | $100,000 | Dec 2020 - July 2021

Marty provided environmental consulting services as a Qualified Person (QP) for assessment of excess soils during the design of the Courtice Trunk Sanitary Sewer Phases 4, 5 and 6. In preparation of the implementation of O. Reg. 406/19 the Region of Durham requested the excess soil planning documentation be provided during the geotechnical drilling program of this project. Marty developed an Assessment of Past Uses, Sampling and Analysis Plan and Soil Characterization reports in accordance with O. Reg. 406/19 for this linear infrastructure project. The reports were utilized during the tendering of the soil management contract.

50 Wilson Heights Development Site

Sr. Engineer – QP$_{ESA}$ |
Deltera Inc. | Toronto, Ontario, Canada | Feb 2020 – July 2020

As part of the geotechnical, hydrogeological and environmental team, Marty provided environmental consulting services as a QP for assessment of excess soils during the design phase of the 50 Wilson Heights development project. In preparation of the implementation of O. Reg. 406/19 an Assessment of Past Uses report, Sampling and Analysis Plan, and Soil Characterization Reports were prepared during the geotechnical drilling program of this construction project. The reports were utilized during the tendering of the soil management contract.

Project experience – Large-scale Brownfield Development

Port Lands Flood Protection & Enabling Infrastructure – Roads Design Team

Owners Qualified Person |
Waterfront Toronto | Toronto, Ontario, Canada | $1.25 B | Mar 2018 - July 2021

As part of the larger PLFPEI Project, Waterfront Toronto is constructing new roadways, landscaping, and utility services throughout the highly contaminated former industrial Port Lands neighbourhood.

Marty provided Environmental Engineering services for the design and construction of the roadways throughout the Port Lands as the owners QP. Marty integrated and implemented the Risk Management Measures for the roadway design to protect the future users of the neighbourhood. During the construction of the roadways Marty developed Environmental Plans for the management of all site soil movements and managed the site inspections and compliance reviews of the subcontractors to ensure that the roadways were constructed in accordance with O. Reg. 406/19. Marty was the liaison with the Contractor Manager (EllisDon) and their subcontractors to responds to any RFI regarding soil management. Marty managed all documentation provided by the Construction Manager related to soil management. It is expected by completion of the project, up to 200,000 m3 of soil will be placed as fill material and surcharge for construction of the roadways.

Port Lands Remediation Technologies

Project Manager |
Waterfront Toronto | Toronto, Ontario, Canada | $300,000 | Oct 2016 - Apr 2018

WSP completed two pilot-scale testing projects on remediation technologies to assess their application on the Port Lands. The first technology is Block & Adsorb. Block & Adsorb is an innovative, combined remedial approach that combines two (2) forms of proven technology to immobilize PHC-based LNAPL in- situ, namely physical stabilization using Portland Cement (PC) (the "Block" portion), and carbon adsorption using Activated Carbon (AC) (the "Adsorb" portion). The theory behind the technology is that the AC component will adsorb some or all of the free-phased LNAPL present in the soils and the PC will serve to bind the soil matrix together and lower the hydraulic conductivity thereby further physically immobilizing the LNAPL in-situ.

The second technology, Enhanced Biodegradation, was tested to evaluate the effectiveness in remediating moderate to high concentrations of PHCs in soil, but not including soils impacted with NAPL PHCs. Enhanced Biodegradation also results in the complete mineralization of the PHCs (into carbon dioxide and water) with possibly a minor amount of residual inorganic salts.

West Don Lands

Field Team Lead |
Waterfront Toronto | Toronto, Ontario, Canada | $20 M | May 2010 - July 2016

At the time the largest brownfield site under development in Ontario, this former industrial site will encompass mixed-use residential and commercial development, as well as a substantial parkland component, after it served as the Pan American Athletes' Village for the 2015 Pan/Parapan American Games. This revitalization project involved an aggressive schedule to secure the environmental approvals required in advance of infrastructure and building construction by development partners. Site characterization, risk assessment, remedial option feasibility studies, remediation, and risk mitigation measures are key project components. The project mandate included field investigations and prepared multiple Phase One and Phase Two ESA, ROFS, and RA reports in parallel in order to meet the development schedule. The reports complied with (O. Reg.) 153/04 under the Environmental Protection Act, as amended by O. Reg. 511/09, such that Records of Site Condition (RSCs) will be obtained on properties prior to development.

As Field Team Lead, Marty led my team of twenty staff in successfully completing the Phase Two ESAs despite an extremely tight schedule and under new Record of Site Condition regulations. Marty also worked with key stakeholders to identify and resolve issues during the construction of the Risk Management Measures.

Project experience – Record of Site Condition Filing (O. Reg. 153/04)

LCBO Headquarters Redevelopment

Sr. Engineer – QP_{ESA} |
Menkes | Toronto, Ontario, Canada | Aug 2016 - July 2021

As part of the LCBO Headquarters redevelopment, WSP completed Environmental Site Assessment (ESA) and Risk Assessment (RA) services for multi-block development blocks at the property, including commercial, community, residential and parkland land uses. A site wide Phase One ESA and Phase Two ESA started in 2013 as the development strategy was being prepared. Numerous updates to the ESA's have been completed for the various development blocks as development has moved forward. Two development blocks have had RA's completed for the conveyances of these parcels to the City of Toronto was future roadways. Two developments blocks have had acknowledged Record of Site Conditions by the Ministry of the Environment, Conservation and Parks (MECP). Active project works includes the oversight of the construction of Risk Management Measures, preparation of a Tier III RA for the park block, and the future development of a residential block. The project mandate was to provide environmental, geotechnical and hydrogeological consulting for proposed mixed use development including lands to be conveyed to the City of Toronto.

500 Lake Shore Redevelopment

Sr. Engineer – QP_{ESA} |
Capital Developments | Toronto, Ontario, Canada | Apr 2018 - Mar 2021

As part of the Loblaws former Head Office and Warehouse redevelopment project at the north-east corner of Bathurst Street and Lake Shore Blvd. West in Toronto, ON, Marty completed Environmental Site Assessment (ESA) and Risk Assessment (RA) services for the land conveyance parcel to the City of Toronto. From the Phase One and Two ESA exceedances of the applicable Site Condition Standards were found in surface soil and deeper subsurface soils. To handle this contamination a Modified Generic Risk Assessment (MGRA) was completed for the property including the issuing of a Certified of Property-Use (CPU) with Risk Management Measures (RMMs). WSP provided oversight during the development of the property to ensure the complete construction of the RMMs and preparation of CPU documents, such as a Site Plan. All ESA, RA, and CPU documents were provided to the City

of Toronto Peer Reviewer for their review and approval. The peer review was successfully completed in March 2021 and the property was conveyed to the City of Toronto.

3C Waterfront Development Project

Sr. Engineer – QP_{ESA} |
Castlepoint Numa | Toronto, Ontario, Canada | Jan 2018 - July 2021

As part of the 3C Waterfront development site at the south-west corner of Lake Shore Blvd. East and Cherry Street in Toronto, ON, WSP completed Environmental Site Assessment (ESA) services for the first block of a multi-block redevelopment site. A Phase One ESA and Phase Two ESA have been completed for the Phase 1 block, a commercial office building development. WSP advice Castlepoint Numa on development strategies for the block and the future adjacent block residential block. The original plan was to connect the below grade parking structures between the blocks. If the blocks were developed this way the Risk Management Measures (RMMs) for the future residential block would be applicable to the commercial block and therefore an expensive vapour barrier system would been required. At WSP's advice the design plans were changed to not connect the below grade parking structures, therefore saving our client these additional costs.

Concord Park Place

Sr. Engineer – QP_{ESA} |
Concord Adex | Toronto, Ontario, Canada | Aug 2016 - Feb 2019

For the redevelopment of a 30-acre Brownfield site which was previously a major Canadian Tire warehouse facility, Marty conducted multiple Phase One ESA, Phase Two ESA, and filing of Records of Site Conditions for various redevelopment blocks including residential condominium towers and city parks to be conveyed to City of Toronto.

Project experience – Peer Review

Brightwater Remediation Peer Review

Peer Reviewer |
Region of Peel | Port Credit, Ontario, Canada | Mar 2018 - Sept 2019

For the 29-hectare brownfield redevelopment site in Port Credit, Ontario Marty was the Peer Reviewer for the lands to be conveyed to the Region of Peel. This work involves the review of environmental deliverables such as Phase One and Phase Two ESAs, remedial action plans, and design plans for public roadways and utility services. On behalf of the Region of Peel, Marty's role was to review the environmental deliverables with respect to compliance with O. Reg. 153/04 and Region of Peel land conveyance policy. This involves working directly with the various Region of Peel departments involved with the future roadways and utility services and the land developers QP.

Lakeview Village Environmental Site Assessment Peer Review

Peer Reviewer |
Region of Peel | Port Credit, Ontario, Canada | June 2019 - Nov 2019

For the 72-hectare brownfield redevelopment site in Port Credit, Ontario Marty was the Peer Reviewer for the lands to be conveyed to the Region of Peel. This work involves the review of environmental deliverables such as Phase One and Phase Two ESAs, remedial action plans, and design plans for public roadways and utility services. On behalf of the Region of Peel, Marty's role was to review the environmental deliverables with respect to compliance with O. Reg. 153/04 and Region of Peel land conveyance policy. This involves working directly with the various Region of Peel departments involved with the future roadways and utility services and the land developers QP.

Project experience – Certificate of Property Use Management

Aitken Place Park

Sr. Engineer – QP_{ESA} |
UCC Group | Toronto, Ontario, Canada | Jan 2019 – Sept 2019

Marty was the Qualified Person for the construction of the future City of Toronto Park within the East Bayfront Development area. This property required the construction of Risk Management Measures as per the Certificate of Property Use registered on title. The project included the construction of utility services, hard and soft cap barriers, exportation of contaminated soils and analytical results of all imported soils for the finished landscaping. An Annual Report and Site Plan were developed to summarize the construction of the Risk Management Measures.

Project experience – Environmental Site Assessment

Scarborough Subway Extension

Sr. Engineer – QP_{ESA} |
Metrolinx | Toronto, Ontario, Canada | Dec 2019 - July 2021

Senior Engineer/Qualified Person for the Phase One Environmental Site Assessments conducted on all of the land acquisitions for the extension of the Scarborough subway along the McCowan alignment. Lead the completion of 14 Phase One ESA reports and an

Executive Summary for the complete subway alignment. All documents were included in the tendering package for the project constructor. TO reduce the project delivery schedule and reduce the cost of our client, Marty advised to utilize the land conveyance Phase One ESA reports to complete the Infrastructure Ontario required Phase One ESA for the full alignment of the subway.

West Park Healthcare Centre

Senior Project Manager |
EllisDon Design Build Inc. | Toronto, Ontario, Canada | $300,000 | Jan 2017 - July 2021

Senior Project Manager for the pursuit / design / build of the new hospital at West Park Healthcare Centre. Responsible for leading the team (geotechnical, hydrogeological, paving, and environmental disciplines) during all phases of pursuit, design, and construction. The tasks included project budgeting, project schedule coordination, liaison with other consultants and subcontractors.

Former Orangeville Rail Contaminant Overview Study

Sr. Engineer – QP_{ESA} |
Region of Peel | Peel Region, Ontario, Canada | Feb - May 2020

Senior Engineer/Qualified Person for the Contaminant Overview Study for the future development of the Former Orangeville Rail to a recreational trail. This work was completed as part of the pre-purchase due diligence works prior to the acquisition of the properties. The entire 55.4-kilometre rail corridor was investigated for potential environmental contaminants of concerns as part of the study. The final report provided our recommendations for the next phase of the project to conduct focused Phase Two ESAs on the highest risk sections of the rail corridor.

10179 & 10185 Mississauga Road Due Diligence

Sr. Engineer – QP_{ESA} |
Region of Peel | Brampton, Ontario, Canada | Apr - June 2020

Senior Engineer/Qualified Person for the Phase One and Phase Two Environmental Site Assessments conducted on the properties as part of the pre-purchase due diligence works. The work was completed while the current owner's tenants were living on the properties. Extra care was taken to provide the tenants was great communication regarding site visits and the intrusive drilling program. Borehole placement was selected to reduce the impact on the existing landscaping on the property. The project reports were completed prior to the close of the due-diligence period.

Sandhill Environmental Baseline Investigation

Sr. Engineer – QP_{ESA} |
Region of Peel | Caledon, Ontario, Canada | Apr - June 2020

Senior Engineer/Qualified Person for the Baseline Investigation on the properties at Lot 27 & 28, King Street in Caledon, Ontario, also known as Sandhill. This investigation was conducted for the Region of Peel to determine of the adjacent property at 5731 King Street (privately owned) had impacted the soil, sediment and/or surface water conditions on the property. A Sample and Analysis Plan was developed based on the potential environmental contaminants of concern followed by a borehole drilling, sediment and surface water sampling program. From the findings of this investigation, WSP was able to provide our client with important information to address the environmental contamination found on the property.

938 East Avenue Development

Sr. Engineer – QP_{ESA} |
Region of Peel | Mississauga, Ontario, Canada | Aug 2016 - June 2018

A Phase One and Two ESA was completed for the property at 938 East Avenue in Mississauga, ON. The property had a former underground storage tank (UST) that was investigated for potential contamination in soil and groundwater. These investigations were completed for the redevelopment of the property to an Emergency Medical Services station. Marty was the Qualified Person that oversaw the project as the Senior Reviewer and provided direction to the junior and intermediate staff.

UP Express

Safety & Security Certification Lead |
Metrolinx | Toronto, Ontario, Canada | Mar 2015 - June 2015

Marty was responsible for developing a program to document the Safety & Security Certification process for the UP Express project in accordance with the American Public Transportation Association. The project mandate was to provide program management services to UP Express, an air rail link connecting Canada's two busiest transportation hubs, Union Station in downtown Toronto and Toronto Pearson International Airport. In role as Acceptance Testing Lead, responsible for coordinating the installation and acceptance testing of Airline Kiosks at the station platforms with the hardware/software vendor NCR. Installation of the kiosks was completed on time for start of revenue services.

Former Camp Ipperwash Contaminated Sites Investigation

Field Team Lead |
Defence Construction Canada | Ipperwash, Ontario, Canada | Dec 2013 - Aug 2014

Field Team Leader for a large-scale environmental investigation. Project work included developing and executing project plans (quality assurance, health and safety, work plans), sampling and testing a range of environmental media (soil, sediment), geophysical survey, preliminary remedial/risk management options analysis, developing cost estimates for full-scale UXO clearance and environmental remediation; completing project work under an SAR permit; management of characterization data using an integrated database and GIS. COCs included a wide range of contaminants associated with disposal from military training activities. A radiological survey program was developed to assess alleged disposal of radiological wastes in several areas and to evaluate the potential presence of radiological contamination in former military facilities / barracks, many now under residential use. The project included establishing a temporary base of operations, management of 6 main subcontracts and multiple suppliers.

Port Hope Industrial Sites

Field Lead |
Public Works and Government Services Canada | Port Hope, Ontario, Canada | Jan 2013 - June 2013

Organized and conducted Phase Two ESAs at three industrial sites within the City of Port Hope. Activities included borehole and groundwater monitoring drilling, well development, groundwater sampling, surveying, and radiological surveying. All documentation was completed to the O. Reg. 153/04 standard for the potential filing of three RSCs.

Kingston Dry Docks

Field Lead |
Public Works and Government Services Canada | Kingston, Ontario, Canada | 2008 - 2013

Organized and conducted biannual monitoring of the groundwater monitoring well network at the Kingston Dry Docks site. This national historic site in downtown Kingston, Ontario is the home of the Alexander Henry Canadian Coast Guard ship. Activities included borehole and groundwater monitoring drilling, well development, groundwater sampling, surveying, and sediment sampling. All documentation was completed to the CCME federal guidelines.

Darlington Nuclear Background Environmental Assessment

Field Lead |
Ontario Power Generation | Darlington, Ontario, Canada | 2007 - 2011

An active role l-ading the field staff involved in a large-scale hydrogeological component of the Background EA project for the future construction of a new generator station. Activities included groundwater monitoring well drilling, deep bedrock coring, well development, and groundwater sampling. As part of this project, a 24-hour pumping test was conducted with additional monitoring of drawdown in four groundwater well nests.

TransCanada Pipeline Compression Station Annual Monitoring

Field Technician |
TransCanada Pipeline | Northern Ontario, Canada | 2007 - 2011

Monitoring groundwater plumb transport at numerous compressor stations across Ontario; Klotz Lake, Hearst, Calstock, Kapuskasing, Smooth Rock Falls, Cochrane, Potter, Swastika, Maple. Activities included groundwater monitoring well drilling, well development, and groundwater sampling.

Warren Croft P.ENG., QP_{ESA}

Engineering Leader

Location

Toronto, Ontario, Canada

Experience

20 years

Qualifications/Accreditations

– B.Sc., Engineering, University of Guelph, 2001
– Qualified Person for Environmental Site Assessment (QP_{ESA}), under Ontario Regulation (O.REG) 153/04

Key technical skills

– Environmental Site Assessments
– Environmental Risk Management
– Project Management

Memberships

– Registered Professional Engineer: Ontario

Relevant experience summary

Warren is a Principal/Vice-President at GHD with 20 years of experience in the management of environmental and remediation projects, including over 200 projects in Ontario relating to Phase I and II Environmental Site Assessments (ESAs), Record of Site Condition (RSC), Designated Substances Surveys (DSS), asbestos abatement, environmental remediation, brownfield redevelopment, environmental compliance/permitting, and risk assessment. He guides clients in managing environmental liabilities to support long-term business needs, including the development and implementation of risk management plans. Additionally, Warren is a QPESA for filing RSCs and submitting Phase Two ESA conceptual site models (CSMs) to support Risk Assessments (RAs). Furthermore, Warren acts as a technical ESA resource and leads ESA components of many large, multidisciplinary infrastructure projects throughout the province.

Municipal/Public Infrastructure

RSC Guidance

Technical Advisor
RSC Guidance | City of Barrie | Barrie, ON | 2019 – present

Warren is the Technical Advisor for the preparation of a RSC guidance document to assist City of Barrie in evaluating development applications. The guidance documents outlines how the RSC filing process impacts different types of development applications, and identifies the roles/ responsibilities of different City departments in confirming compliance with Ontario Regulation 153/04.

Project Director

Toronto Street and Simcoe Street Environmental Investigation | City of Barrie | Barrie, ON | 2018 – 2019

Warren is the Project Director for an environmental investigation to document potential extent of impact in the area of Toronto Street and Simcoe Street in Barrie. Warren met with City staff to provide guidance regarding environmental conditions, and options to investigate and/or remediate identified impacts.

ESA Lead

Northeast Vaughan Water and Wastewater Servicing | York Region, ON | 2017 – 2019

Warren acts as the Environmental Site Assessment Lead for the completion of ESA screening and soil/groundwater sampling strategy for the Northeast Vaughan Water and Waster Servicing project. Warren

also provided guidance to the project team regarding ESA requirements for potential land acquisition.

Soil Characterization Program

Environmental Lead |
Waterfront Toronto | Toronto, Ontario, Canada | 2016

Technical advisor during the environmental investigation of a portion of Toronto's Port Lands area, in support of the re-routing of the mouth of the Don River. Supported GHD's project management team and field team in the interpretation of historical records, and completion of soil and groundwater sampling at the site.

Upper York Sewage Solutions (UYSS)

ESA Lead
Regional Municipality of York | East Gwillimbury, Ontario, Canada | 2014 - 2016

Warren acts as the Environmental Site Assessment Lead for the completion of Phase One and Two ESAs to support property acquisition and project planning for the Upper York Sanitary Sewer project. He works with the other discipline leads to ensure that project milestones are met and the client's environmental liability is minimized during property acquisition and construction.

Burnhamthorpe Road Watermain Twinning

Environmental Lead |
Regional Municipality of Peel | Mississauga, Ontario, Canada | 2014 - 2016

Warren acts as environmental lead and completed a Contaminant Inventory and a Phase One ESA to support the Region's project planning. Warren provided guidance regarding identifying higher risk properties and potential contaminant sources within proposed construction areas, and provided recommendations regarding environmental risk at the higher risk properties.

480 Lakeshore Blvd. East

Environmental Lead |
Waterfront Toronto | Toronto, Ontario, Canada | 2011 - 2016

Warren acted as the technical lead and primary Site Assessor for the completion of a Phase I ESA of a former bulk fuel storage facility. Warren provided guidance to the project team regarding the findings of the Phase I ESA and the requirements for soil and groundwater sampling at the Site. Warren subsequently supported the construction of specific Risk Management Measures to comply with City of Toronto requirements.

Seneca College King Campus Expansion

Project Manager |
Seneca College | King City, Ontario, Canada | 2014 - 2016

Warren acted as Project Manager for the completion of environmental and geotechnical investigations at King City campus of Seneca College in support of a proposed building expansion following Infrastructure Ontario's AFP model. Based on the results of preliminary environmental investigations, a Due Diligence Risk Assessment was completed to document potential environmental risks associated with road salt impacts to the Site. GHD's team worked with Seneca College staff to complete the work at an active educational facility, while minimizing impacts to staff and students. He coordinated site access, including work around entrance roads, along Dufferin Street, and within active agricultural fields and acted as technical lead for environmental components of the project.

Etobicoke General Hospital

Project Manager |
William Osler Health System | Etobicoke, Ontario, Canada | 2014 - 2015

Warren acted as Project Manager for the completion of environmental and geotechnical investigations at Etobicoke General Hospital in support of proposed redevelopment. Coordinated site access, including work around emergency room entrance, main entrance, and visitor parking areas. Acted as technical lead for environmental components of the project.

Milton District Hospital

Environmental Lead |
Shared Services West | Milton, Ontario, Canada | 2013 - 2014

Warren acted as the Environmental Lead for environmental investigations at Milton Hospital, including the completion of Phase One and Two ESAs and coordination of asbestos sampling activities. Worked with the geotechnical lead to ensure that appropriate environmental samples were collected, while minimizing the number of boreholes/monitoring wells at the site. Assisted Milton Hospital and Shared Services West staff in negotiating environmental management requirements with the municipality and Infrastructure Ontario.

Infrastructure Ontario

Thistletown Regional Campus

Project Manager |
Infrastructure Ontario (IO) | Toronto, Ontario, Canada | 2013 - presents

Project manager for the completion of Phase I and II ESAs, completion of designated substances surveys, design and oversight of remedial program, and completion of a due diligence risk assessment at the Thistletown Regional Campus in Toronto, Ontario. Coordinated access with facility personnel, and developed specific health and safety protocols to ensure that investigative activities did not pose a risk to property residents.

Ontario Place Redevelopment

Project Manager |
Infrastructure Ontario | Toronto, Ontario, Canada | 2012 - present

Warren acts as Project Manager for due diligence activities at Ontario Place, which have included Designated Substances Survey, Building Condition Surveys, Phase One and Two ESAs, and Geotechnical Investigations. Warren is currently managing the completion of a Phase One and Two ESA, Risk Assessment, and Record of Site Condition for a portion of the east island, to support the Urban Park and Waterfront Trail project. Warren also provides guidance to Infrastructure Ontario and their park design team regarding the design and construction of Risk Management Measures and imported soil quality requirements, to ensure that ongoing construction is consistent with the Risk Assessment and that the soil brought to the proposed park is suitable for use at Ontario Place.

Vendor of Record, Central and Southwestern Regions

Technical Lead |
Infrastructure Ontario | Ontario, Canada | 2012 - 2016

Warren acts as a technical lead and primary contact for GHD's Vendor of Record contract with Infrastructure Ontario, which has included Phase One and Two ESAs, designated substances surveys, remediation oversight, Risk Assessment, and Records of Site Condition. Warren attends monthly vendor calls, tracks performance of GHD's projects, acts as a key technical contact regarding environmental site assessments, and also manages a variety of Infrastructure Ontario projects.

Proposed ErinOak Kids

QP_{ESA} |
Infrastructure Ontario | Brampton, Ontario, Canada | 2014 - 2015

QPESA for the filing of Records of Site Condition for two parcels of land associated with the proposed ErinOak Kids Brampton facility. Coordinated the completion of Phase One and Two ESAs, provided guidance to the current property owner (City of Brampton) regarding the RSC process and the documents that must be prepared and signed by the owner to support the RSC filing, and coordinated with MOECC Brownfields group staff regarding the RSC filing. Filed two RSCs on the Ontario Environmental Site Registry, which were acknowledged by MOECC.

Proposed Mackenzie Vaughan Hospital

Project Manager |
Infrastructure Ontario | Vaughan, Ontario, Canada | 2013 - 2015

Warren acted as Project Manager for the completion of environmental, geotechnical, and hydrogeological investigations at the proposed Mackenzie Vaughan Hospital. The project was completed following Infrastructure Ontario's Alternative Financing and Procurement (AFP) Guidance Document for Environmental and Geotechnical Investigations. GHD also worked with staff and consultants from the City of Vaughan to support the remediation of localized soil impacts and the filing of a Record of Site Condition. He coordinated site access and acted as technical lead for environmental components of the project.

Due Diligence

Project Manager |
Infrastructure Ontario | Ontario, Canada | 2013 - 2015

Project Manager for the completion of a Designated Substances Survey and Phase One ESA at a potential redevelopment property in Toronto. Subsequently provided technical guidance to Infrastructure Ontario regarding the disentanglement of the building heating system from adjacent structures, including the removal of asbestos on piping. Provided recommendations regarding building ventilation requirements to prevent mold growth. Currently working with Infrastructure Ontario to develop abatement specifications for the Designated Substances in the building.

Former St.Thomas Psychiatric Facility

Project Manager |
Infrastructure Ontario | St.Thomas, Ontario, Canada | 2012 - 2013

Project manager for the completion of a Phase One ESA and Soil/Groundwater quality investigation at the St. Joseph's Regional Mental Health facility in St. Thomas, Ontario. Completed interviews with facility personnel, inspected client and resident spaces, and coordinated health and safety requirements for the completion of the soil and groundwater sampling activities.

Environmental Specialist (Secondment)

Infrastructure Ontario | Toronto, Ontario, Canada | 2010 - 2012

Warren assisted Infrastructure Ontario in the management of environmental consultants and contractors at the West Don Lands in Toronto, Ontario in support of the redevelopment of a large brownfield property into the 2015 Pan Am Games Athletes' Village. Tasks included coordination of consultants and contractors, providing guidance to ORC staff on the environmental approvals process, and review of Phase I/II ESAs, Risk Assessments, Certificates of Property Use, and Records of Site Condition completed in accordance with the recently revised Regulation 153/04. Attended meetings with stakeholders including Ministry of Environment, City of Toronto, Waterfront Toronto, Infrastructure Ontario, and prospective developers to support Infrastructure Ontario staff in their role.

Industrial/Private Infrastructure

Risk Assessment

Project Manager |
Confidential Client | Toronto, Ontario, Canada | 2013 - present

Project Manager and QP (ESA) for the completion of a Phase One and Two ESA, and Risk Assessment at an active industrial property in Toronto, Ontario, completed to support the sale of the property, and to document liabilities at the time of the sale.

Risk Assessment

Project Coordinator |
Confidential Client | Mississauga, Ontario, Canada | 2012 - present

Project Coordinator and QPESA for a Phase One ESA, Phase Two ESA, and Risk Assessment of an industrial brownfield site. The project included development of risk based remedial targets for soil remediation, followed by the completion of a Risk Assessment to manage remaining soil and groundwater impacts.

Proposed Holt Pit

ESA Support |
Rice Commercial Group Ltd. | Newmarket, Ontario, Canada |2017 - 2019

Warren provided Phase One and Two ESA support to the project team related to the proposed Holt Pit. Warren's role focused on Phase One ESA technical review, and confirming that the ESAs met the minimum requirements of Ontario Regulation 153/04, as amended, as well as coordinating sampling requirements with other technical leads.

Healthcare Centre Redevelopment

Environmental Lead |
West Park | Toronto, Ontario, Canada| 2016

Environmental lead for the completion of Phase One and Two Environmental Site Assessments in support of the proposed expansion of the facility. Supported client decision making regarding environmental risk, potential sources of environmental impact, and soil/groundwater management during future construction.

Environmental Due Diligence

Project Manager|
Confidential Client | Toronto, Ontario, Canada | 2016

Warren acts as the project manager for the completion of Phase I ESAs, Phase II ESAs, property condition assessments, remedial cost estimates, and risk evaluations for three industrial properties. GHD's client was considering the acquisition of the three properties, and required technical guidance regarding environmental liabilities, and options to mitigate environmental risks for the long-term use of the Site.

Lakeview Power Plant

Project Manager|
Ontario Power Generation | Mississauga, Ontario, Canada |
2015 - 2016

Warren acts as the project manager for ongoing environmental activities at the former OPG Lakeview Power Plant. GHD has completed extensive environmental investigations, focused environmental remediation, and Risk Assessment activities in support of OPG's land use and disposition planning. Currently supporting OPG's goals of facilitating the redevelopment of the Site in accordance with the Inspiration Lakeview vision.

Assembly Plant Demolition

Environmental Lead and QP_{ESA} |
Ford | St.Thomas, Ontario | 2014 - 2016

Warren acted as the lead environmental site assessor and QPESA for the completion of Phase One and Two ESAs at the Ford St. Thomas facility. Obtained Record of Site Condition (RSC) for one portion of the Site, and supported GHD's Risk Assessment and Remediation teams in the assessment and remediation of the other portions of the Site.

Review of Excess Soil Management in Ontario

Team Member |
GHD | Ontario, Canada | 2015

Warren was a member of GHD's project team to complete a review of excess soil management in Ontario. Warren's role focused on identifying common practices, and best practices among contractors, municipalities, and government related agencies, to support the development of an improved process to manage excess soil in Ontario.

Risk Evaluation

Project Coordinator |
Confidential Client | Toronto | 2013 - 2014

Warren acted as project coordinator during a risk evaluation project, to support a potential property sale. His scope included coordinating access to an active facility, discussing the scope of work with potentially affected tenants, coordinating soil, groundwater, and indoor air monitoring activities, and reporting. The project team subsequently completed a risk evaluation, supported with Risk Management Measures developed by Warren and his team. The client was able to complete the transaction of the property, despite documented environmental liability concerns.

Risk Management Measure Implementation

Project Manager |
Confidential Client | Toronto, Ontario, Canada | 2010 - 2013

Project Manager for the oversight of Risk Management Measure (RMM) implementation, to comply with the requirements of a Certificate of Property Use. Activities completed by GHD included preparation of soil and groundwater management plan, preparation of Health and Safety Plan, dust monitoring, soil tracking, barrier construction inspection, and reporting. Warren acted as Project Manager and primary liaison for the client and their contractor, to ensure that the Certificate of Property Use requirements were understood and implemented.

Please refrain from sending documents to head office. The Public Information (PI) team works remotely, mailing in applications will lengthen the overall processing time.

NO RECORD FOUND IN CURRENT DATABASE

Hello David,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

- We confirm that there are no records in our current database of any fuel storage tanks at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please submit an application for release of public information (PI Form) through TSSA's new Service Prepayment Portal. The associated fee must be paid via credit card (Visa or MasterCard) through a secure site.

Please follow the steps below to access the new application(s) and Service Prepayment Portal:

1. Click Release of Public Information - TSSA - TSSA and click "need a copy of a document";
2. Select the appropriate application, download it and complete it in full; and
3. Proceed to page 3 of the application and click the link TSSA Service Prepayment Portal under payment options (the link will take you the secure site to pay for the release via credit card).

Accessing the Service Prepayment Portal:

1. Select new or existing customer (*if you are an existing customer, you will need your account # & postal code to access your account);
2. Select the program area: AD (Amusement Devices), BPV (Boilers and Pressure Vessels), ED (Elevating Devices), FS (Fuels Services), OE (Operating Engineers) or SKI (Ski Lifts) and click continue;
3. Enter the application form number (obtained from bottom left corner of application form) and click continue;
    a. When selecting the application form number from the drop-down menu, please make sure you select the application that begins with "PI" (i.e. PI-FS, PI-BPV etc.);
4. Complete the primary contact information section;
5. Complete the fees section;
6. Upload your completed application; and
7. Upload supporting documents (if required) and click continue.

Once all steps have been successfully completed, you will receive your receipt via email.

Questions? Please contact TSSA's Public Information Release team at publicinformationservices@tssa.org.
Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind Regards,

Nicola Carty | Public Information Agent

Subject: Records Request - 12585643

Hello,

Can you please search your databases for records of ASTs, USTs and/or fuel storage at the following address in Udora, Ontario:

1. 1 Birdie Smith Court;
2. 2 Birdie Smith Court;
3. 3 Birdie Smith Court;
4. 4 Birdie Smith Court;
5. 14540-14700 Durham Regional Rd 1;
6. 14874 Durham Regional Rd 1;
7. 14900 Durham Regional Rd 1;
8. 14970 Durham Regional Rd 1;
9. 693 Ravenshoe Road; and
10. 689 Ravenshoe Road.

Thanks,

David Blair (he/him)

Dear David Blair:

RE: **MECP FOI A-2022-06991, Your Reference 12585643 – Decision Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to Lot 35, Concession 6, Uxbridge, Udora.

After a thorough search through the files of the ministry's York Durham District Office, Environmental Assessment and Permissions Division (EAPD), Environmental Monitoring and Reporting Branch (EMRB), Environmental Investigations and Enforcement Branch (EIEB), and Safe Drinking Water Branch (SDW) no records were located responsive to your request. **This file is now closed.**

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at http://www.ipc.on.ca. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Tolani Abraham at Tolani.Abraham2@ontario.ca.

Yours truly,

ORIGINAL SIGNED BY

Ryan Gunn
Manager (A), Access and Privacy Office

Executive Summary: Summary By Data Source

DTNK - Delisted Fuel Tanks

A search of the DTNK database, dated Feb 28, 2022 has found that there are 1 DTNK site(s) within approximately 0.30 kilometers of the project property.

Site	Address	Distance (m)	Map Key
	5 VICTORIA ST UDORA ON L0C 1L0	128.8	52

EHS - ERIS Historical Searches

A search of the EHS database, dated 1999-Mar 31, 2022 has found that there are 4 EHS site(s) within approximately 0.30 kilometers of the project property.

Site	Address	Distance (m)	Map Key
	Ravenshoe & Victoria Road Georgina ON L0C	84.1	42
	673 Ravenshoe Road Uxbridge ON L9P 0A9	99.3	46
	9 Victoria St Georgina ON L0C 0A2	158.5	58
	715 Ravenshoe Rd Uxbridge ON L0E1R0	211.7	72

FST - Fuel Storage Tank

A search of the FST database, dated Feb 28, 2022 has found that there are 4 FST site(s) within approximately 0.30 kilometers of the project property.

Site	Address	Distance (m)	Map Key
UDORA MARKET O/A GAS STN	5 VICTORIA ST UDORA L0C 1L0 ON CA ON	128.8	52

Site	Address	Distance (m)	Map Key

UDORA MARKET O/A GAS STN	5 VICTORIA ST UDORA L0C 1L0 ON CA ON	128.8	52

FSTH - Fuel Storage Tank - Historic

A search of the FSTH database, dated Pre-Jan 2010* has found that there are 2 FSTH site(s) within approximately 0.30 kilometers of the project property.

Site	Address	Distance (m)	Map Key
UDORA MARKET O/A GAS STN	5 VICTORIA ST GD UDORA ON L0C 1L0	128.8	52
UDORA MARKET O/A GAS STN	5 VICTORIA ST UDORA ON L0C 1L0	128.8	52

GEN - Ontario Regulation 347 Waste Generators Summary

A search of the GEN database, dated 1986-Apr 30, 2022 has found that there are 2 GEN site(s) within approximately 0.30 kilometers of the project property.

Site	Address	Distance (m)	Map Key
BETTER BUILT TOOLING LTD	14827 DURHAM RD 1 GENERAL DELIVERY UDORA ON L0C 1L0	71.8	34
BETTER BUILT TOOLING LTD	14827 DURHAM RD 1 GENERAL DELIVERY UDORA ON L0C 1L0	71.8	34

PRT - Private and Retail Fuel Storage Tanks

A search of the PRT database, dated 1989-1996* has found that there are 1 PRT site(s) within approximately 0.30 kilometers of the project property.

Site	Address	Distance (m)	Map Key
CANNINGTON EXCAVATING 1989	VICTORIA ST & RAVENSHOE RD COR UDORA ON	84.9	43

SCT - Scott's Manufacturing Directory

A search of the SCT database, dated 1992-Mar 2011* has found that there are 2 SCT site(s) within approximately 0.30 kilometers of the project property.

Site	Address	Distance (m)	Map Key
Air-Dust-Tech Services	14822 Regional Road 1 Udora ON L0C 1L0	37.1	23
Better Built Tooling Ltd.	14827 Durham Rd 1 Udora ON L0C 1L0	71.8	34

SPL - Ontario Spills

A search of the SPL database, dated 1988-Sep 2020; Dec 2020-Mar 2021 has found that there are 2 SPL site(s) within approximately 0.30 kilometers of the project property.

Site	Address	Distance (m)	Map Key
The Regional Municipality of York	Ravenshoe Road E & Victoria Road Georgina ON	84.9	43
EarthHeat.ca Inc.	14 Victoria Rd Town of Udora Georgina ON	133.4	54

WWIS - Water Well Information System

A search of the WWIS database, dated Jan 31, 2022 has found that there are 95 WWIS site(s) within approximately 0.30 kilometers of the project property.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Nov 2021

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-May 31, 2022

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2020

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-May 31, 2022

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Apr 2022

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jun 2022

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Jul 31, 2022

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Feb 28, 2022

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Jul 31, 2022

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jul 31, 2022

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Jul 31, 2022

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Mar 31, 2022

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2021

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Jun 2022

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2022

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 21, 2022

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2022

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2020

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 31, 2022

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jan 2021

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Jul 31, 2022

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Jul 31, 2022

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Jul 31, 2022

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2019

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jul 2022

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-May 31, 2022

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Sep 2020; Dec 2020-Mar 2021

Wastewater Discharger Registration Database: Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2020

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Jul 31, 2022

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Jan 31, 2022

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Re: Phase One Environmental Site Assessment
Part of Lot 35 Concession 6, Udora, Ontario
Project No. 161-09454-00

Dear Mr. Risi,

WSP Canada Inc. is pleased to provide the following report to document the Phase One Environmental Site Assessment (ESA) for the property located at Part of Lot 35 Concession 6, Udora, Ontario (Phase One Property).

The Phase One ESA followed the practices of *Ontario Regulation 153/04 as amended*. At this time, WSP understands that filing a Record of Site Condition (RSC) is required because the future land use is considered to be more sensitive than present/past land use. The Phase One ESA report describes the interpreted environmental conditions at the Phase One Property and provides conclusions for your consideration.

We trust that this information is sufficient for your current needs. If you have any questions or require further information, please contact us.

Yours truly,
WSP Canada Inc.

Lloyd A. Lemon, M.Sc., P.Geo.
Senior Project Geoscientist

1 EXECUTIVE SUMMARY

WSP Canada Inc. (WSP) was retained by Tony Risi of Capris Investments Ltd. to conduct a Phase One Environmental Site Assessment (ESA) for the property located at Part of Lot 35 Concession 6 in the community of Udora, in the Town of Uxbridge, Ontario (Phase One Property). A portion of the Phase One Property is owned by The Corporation of the Township of Uxbridge to be used for future roadways within proposed residential developments. The purpose of a Phase One ESA is to identify potential environmental concerns that relate to past and present on-site and off-site activities. WSP understands that the Phase One ESA was requested to identify potential environmental concerns that relate to past and present activities on-site and off-site on nearby properties

The Phase One ESA followed the practices of *Ontario Regulation 153/04 as amended*. At this time, WSP understands that filing a Record of Site Condition (RSC) is required because the future land use is considered to be more sensitive than present/past land use.

The Phase One ESA included the following:

1. Records review.
2. Site reconnaissance by an experienced Environmental Site Assessor to examine the Phase One Property and surrounding properties (from within the Site and public areas) for evidence of potential sources of contamination.
3. Evaluation of information from records review and reconnaissance of the Phase One Property and preparation of a conceptual site model (CSM).
4. Report of the findings.

The findings of the Phase One ESA are:

- The Phase One Property is located south of Ravenshoe Road (Regional Road 32) and west of Concession Road 7 (Regional Road 1) in the community of Udora, Ontario. The Phase One Property is approximately 3.0 hectares (7.4 acres) in size, irregular in shape, and contained no structures at the time of site reconnaissance.
- The Phase One Property is comprised of three land parcels. The ownership of Part of Lot 35 Concession 6, Udora, was transferred to Marfab Investments Inc. and 1613871 Ontario Ltd. in 2004. The Chain of Title indicates that full ownership was transferred from 1613871 Ontario Ltd. to Marfab Investments Inc. in 2010. Mr. Risi confirmed that Marfab Investments Inc. was the previous name of Capris Investments Inc. Mr. Risi informed the site assessor that there was a plan to construct a road through the property a few years ago. The construction of this road has not taken place. According to the chain of title, ownership of one (1) parcel of the Phase One Property was transferred to The Corporation of the Township of Uxbridge in 2005. This parcel is a “T” shape that separates the two parcels now owned by Capris Investments Inc.
- The Chain of Title indicates that the Phase One Property was previously owned by private individuals and investors until Marfab Investments Inc. purchased the Phase One Property in 2004.
- The owner of Capris Investments Ltd., Mr. Tony Risi, was interviewed on July 6, 2016 as part of the Phase One Investigation.

- Information provided by Mr. Risi as well as from a review of historical aerial photographs indicates that a salvage yard may have been present on the Phase One Property in the 1950s until sometime between 1966 and 1974. Otherwise, the Phase One Property has historically been used for agricultural purposes or has been vacant. No records were identified for the Phase One Property or for Properties within the Phase One Study Area in a review of Environmental Records.
- The topography at the Phase One Property generally slopes towards the north. The elevation at the Phase One Property ranges from 260 metres above sea level (masl) to 245 masl.
- The Phase One Property is situated between the Peterborough Drumlin Field and Simcoe Lowlands physiographic regions as defined by Chapman and Putnam (1984). The Phase One Property is between drumlinized till plains and sand plains physiographic landforms (OGS, 2015). The surficial geology in the vicinity of the Phase One Property is described as “stone-poor, sandy silt to silty sand-textured till on Paleozoic terrain” (OGS, 2015). The depth to bedrock is approximately 25-45 metres below ground surface (mbgs) based on bedrock topography mapping (Brennand et al., 1998) and topographic mapping (Department of Energy, Mines, and resources, 1988) and topographic mapping (Department of Energy, Mines and Resources, 1988). The underlying bedrock within the area generally consists of limestone, dolostone, shale, arkose, and sandstone of the Simcoe Group; Lindsay Formation. (Armstrong and Dodge, 2007).
- Groundwater levels beneath the Phase One Property were noted to vary between 1.2 metres and 20 metres below ground surface according to the static water level information presented on water well records maintained by the MOECC. Based on information from a York Peel Durham Toronto (YPDT) Groundwater Management Study (Kassenaar and Wexler, 2006), the regional groundwater flow direction is to the north-northeast towards Lake Simcoe. Based on the local topography, local groundwater flow is to the north or northeast.
- Evidence of water service and sewage works was not observed on the Phase One Property at the time of site reconnaissance. The surrounding properties along Bagshaw Crescent and Birdie Smith Court are serviced by private wells and private sewage systems.
- Inert debris was observed in one (1) location on the Phase One Property.
- Information from Mr. Tony Risi and from a review of aerial photographs indicates that there may have been a salvage yard on the northeast portion of the Phase One Property in the 1950s until sometime between 1966 and 1974. Visible evidence of this historic use was not observed during the site reconnaissance. There was vegetation cover on the ground surface in the area where these activities are reported to have taken place. This activity would correspond to a Potentially Contaminating Activity (PCA) as per Table 2 O.Reg. 153/04: PCA # 49: Salvage Yard, Including Automobile Wrecking.
- Other PCAs identified within the Phase One Study Area include gasoline and associated products storage in fixed tanks (PCA # 28); storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems (PCA # 52) and transformer manufacturing, processing and use (PCA # 55). These PCAs reflect the gas station located at 9 York Regional Road 32 (PCA #28 and PCA # 52) and the presence of six (6) ground transformers along Bagshaw Crescent.

The Phase One ESA identified potentially contaminating activities (PCAs) and assessed the potential for these PCAs to affect the Phase One Property. The PCA identified on-site that corresponds to the historical salvage yard, is identified as; (PCA #49): Salvage Yard, Including Automobile Wrecking, and is considered to present potential to affect soil and/or groundwater beneath the Phase One Property. This PCA is considered to contribute to one (1) area of potential concern (APEC) on the northeastern portion of the Phase One Property. The other identified PCAs are not considered to present potential to affect soil or groundwater beneath the Phase One Property due to the nature of the activities and the groundwater flow direction.

A Phase Two ESA will be required to assess conditions on the Phase One Property and within the APEC relative to the provincial Site Condition Standards.

In accordance with O.Reg. 153/04 a Record of Site Condition (RSC) would be required for the portions of the Phase One Property where there is evidence of historical industrial land where the future land use is proposed to be residential. This corresponds with the area of the identified APEC within the northern property owned by Capris Investments Ltd. A Record of Site Condition would not be required for lands within the identified APEC that are to be used in the future as a roadway.

APPENDICES

2 INTRODUCTION

WSP Canada Inc. (WSP) was retained by Tony Risi of Capris Investments Ltd. to conduct a Phase One Environmental Site Assessment (ESA) for the property located at Part of Lot 35 Concession 6, Udora, Ontario, hereafter referred to as the 'Phase One Property'. The location of the Phase One Property is shown in Figure 1.

The purpose of this Phase One ESA is to identify potential environmental concerns that relate to past and present activities on-site and off-site on nearby properties. The Phase One ESA followed the practices of *Ontario Regulation 153/04 as amended*. At this time, WSP understands that filing a Record of Site Condition (RSC) is required because the future land use is considered to be more sensitive than present/past land use.

WSP understands that the Phase One Property represents a former continuous land block that has been designated for redevelopment as a residential subdivision. Ownership of part of the original land block was transferred to The Corporation of the Township of Uxbridge to reflect future road right-of-way as documented herein. WSP was not provided with records or documentation of environmental site assessments performed in conjunction with this ownership transfer.

WSP understands that the Phase One ESA was requested to support an application to sever a portion of the Phase One Property that fronts to Ravenshoe Road.

2.1 PHASE ONE PROPERTY INFORMATION

The Phase One Property is located south of Ravenshoe Road and west of Concession Road 7 (Regional Road 1) in the small community of Udora, Ontario. The Phase One Property is approximately 3.0 hectares (7.4 acres) in size, irregular in shape, and contained no structures at the time of site reconnaissance.

The Phase One Property is owned by Capris Investments Ltd. and the Corporation of the Township of Uxbridge and consists of three (3) parcels of land and six (6) property identification numbers (PINs) as shown in Table 2-1. One (1) of the parcels is owned by the Corporation of the Township of Uxbridge.

The lands owned by the Corporation of the Township of Uxbridge form a "T" shape that separates the two parcels owned by Capris Investments Ltd. The "T extends east-west from the protrusion on the east side of the Phase One Property toward Regional Road 1, and north-south from the protrusion on the south side of the Phase One Property to the intersection on the east side of the "T". Legal surveys of the property boundaries were not provided to WSP.

2.2 CURRENT AND PROPOSED FUTURE USES

The property at Part of Lot 35 Concession 6 is currently unoccupied. The property is planned to be developed for residential use.

3 SCOPE OF INVESTIGATION

The Phase One ESA was conducted in accordance with Schedule D of O. Reg. 153/04, as amended. The Phase One ESA consisted of a review of available historical information and site reconnaissance. The following sections describe the procedures that were followed in the preparation of the Phase One ESA.

3.1 RECORDS REVIEW

The records review includes:

→ Review of readily available historical records, including but not limited to; aerial photographs, title searches, and topographic and geographic maps was conducted for the Phase One Study Area (i.e. the area within 250 m of the property boundaries of the Phase One Property);

- Review of applicable environmental databases for the Phase One Study Area (including but not limited to: active and former waste disposal sites, coal gasification plants, PCB storage sites and registered waste generators);
- Review of information provided by a request to the Technical Standards and Safety Authority (TSSA) to assist in better understanding if any fuel storage tanks may exist or may have existed on the Phase One Property;
- Review of information provided from a request made to the Ontario Ministry of the Environment and Climate Change (MOECC) Freedom of Information (FOI) office for a search of their records regarding reportable spills, orders and convictions associated with the Phase One Property; and
- A review of additional database information applicable to current or past uses of the Phase One Property, where deemed appropriate.

3.2 INTERVIEW

The owner of Capris Investments Ltd. and of the majority of the Phase One Property, Mr. Tony Risi, was interviewed to gather information of the current site operations and historical site activities.

3.3 SITE RECONNAISSANCE

The Phase One ESA Site reconnaissance was conducted by WSP on July 6, 2016 from 10:00 am to 12:00 pm. The site reconnaissance was carried out to assess potential environmental concerns at the Phase One Property and adjacent properties as observed from the Phase One Property and publicly accessible areas. Assessor qualifications are included in Section 9 of this report. The entire Phase One Property was accessed at the time of the site reconnaissance. No sampling or testing of materials was conducted. Photographs to document the site reconnaissance are provided in Appendix A.

3.4 EVALUATION

The information gathered from the records review and site reconnaissance was evaluated to identify potential contaminating activities (PCAs) and areas of potential environmental concern (APECs).

A Conceptual Site Model was prepared, including a figure showing the property boundaries, the location of significant structures and features and the locations of on-site and off-site PCAs and APECs examined during the Phase One ESA. The Conceptual Site Model is presented as Figure 4, and discussed in Section 7.4.

3.5 REPORTING

A report was prepared and is presented herein to summarize the findings of the Phase One ESA. The level of risk associated with identified concerns is classified in a qualitative manner (i.e. high, moderate, low or minimal risk).

4 RECORDS REVIEW

Information obtained and reviewed as part of the records review for the Site and adjacent properties is listed in Table 4-1.

Table 4-1 Records Reviewed

RECORDS SEARCHED	DATE OF RECORDS FOUND (S)	SOURCE
Aerial Photographs	1927, 1959, 1966, 1976, 1981	National Earth Observation Data Framework Catalogue
	1999, 2005, 2009, 2013, 2015	York Region Maps Website The Phase One Property is located in Durham Region, however as the boundary with York Region is at Ravenshoe Road, the aerial photographs for recent years typically include coverage of the Phase One Property. The available air photos on York Region Maps for the Phase One Study Area from 1970-2015 were reviewed. Air photos that include the Phase One Property and that showed significant change are reviewed and included in this report. Older aerial photographs were used to provide information prior to 2005.

Title Search	Crown - present	Domson's Title Search
Fire Insurance Plans	No Record	Toronto Reference Library The Uxbridge Fire Insurance Plan from 1910 was reviewed. No information was available for the Phase One Property.

4.1 GENERAL

4.1.1 PHASE ONE STUDY AREA DETERMINATION

The Phase One Property consists of three (3) parcels of land that include six (6) property identification numbers (PINs). The five (5) of the six (6) PINs do not have unique municipally designated addresses. The legal description associated with each PIN is presented in Table 2-1. The Phase One Property is located approximately 95 metres west of the intersection of Ravenshoe Road (Regional Road 32) and Concession Road 7 (Regional Road 1) on the west side of Concession Road 7 in Udora, Ontario. The Phase One Property is accessed via Birdie Smith Court.

The Phase One Study Area includes properties within a 0.25 kilometre radius from the Phase One Property boundary. Potential activities of environmental concern in the surrounding areas beyond this Phase One Study Area were also evaluated to assess the potential to impact the Phase One Property.

A review of applicable environmental databases for the Phase One Study Area (including but not limited to: active and former waste disposal sites, coal gasification plants, PCB storage sites and registered waste generators) was conducted in following practices set out in O.Reg. 153/04, as amended. Records reviewed documents are provided in Appendix B.

4.1.2 FIRST DEVELOPED USE DETERMINATION

According to the aerial photograph review (Section 3.3.1) and title search (Section 3.1.4), the Phase One Property and surrounding area appeared to be first developed as agricultural land in 1808. The Phase One Property was owned by private individuals and investors until ownership was transferred to Marfab Investments Inc. (now Capris Investments Inc.) in 2004. Part of the Phase One Property is owned by the Corporation of the Township of Uxbridge. According to Mr. Risi, a road was planned to be constructed through the Phase One Property a few years ago but was never constructed. According to information from Mr. Risi and a review of aerial photographs, a salvage yard may have been present in the northeast portion of the Phase One Property in the 1950s until sometime between 1966 and 1974. There was no confirmation of this information in the Chain of Title or City Directory Search. The Phase One Property has otherwise historically been used for agricultural purposes or has been vacant. The Phase One Property has been vacant since 1974.

4.1.3 FIRE INSURANCE PLANS

Fire Insurance Plans (FIPs) map the streets and buildings of urban Canada in great detail. FIPs are an invaluable resource due to their ability to trace the historical development of many communities across Canada, as well as to provide detailed information regarding storage tanks, transformers, boilers and electrical rooms. The original plans were produced between 1875 and 1923. They continued to be created and updated until production ceased in 1974.

The Fire Insurance Plan information available for Uxbridge, Ontario from 1910 was reviewed. No information was available for the Phase One Property.

4.1.4 CHAIN OF TITLE

A complete Chain of Title for two of the PINs within the Phase One Property was conducted by Domson's Title Search for Part of Lot 35 Concession 6, a summary is provided in Table 4-2a and Table 4-2b.

Table 4-2a Chain of Title for Part of Lot 35 Concession 6, Udora (PIN 0191)

YEAR	NAME OF OWNER	PROPERTY USES
1808	George Bond (from Crown)	Likely Agricultural

2010	Marfab Investments Inc.	Vacant

Table 4-2b Chain of Title for Part of Lot 35 Concession 6, Udora (PIN 0180)

YEAR	NAME OF OWNER	PROPERTY USES
1808	George Bond (from Crown)	Likely Agricultural
1810	Stephen Bond	Likely Agricultural
1810	George Bond	Likely Agricultural
1810	James Cawdell	Likely Agricultural
1836	Benjamin Hawk	Likely Agricultural
1848	Isaac Solomon	Likely Agricultural
1855	George Harrison	Likely Agricultural
1882	Robert Webster	Likely Agricultural
1911	Lester Webster	Likely Agricultural
1920	Solomon Lodwick	Likely Agricultural
1926	Frank Hicks	Agricultural

YEAR	NAME OF OWNER	PROPERTY USES
1928	Ross Bagshaw	Likely Agricultural
1945	Marcella Bagshaw	Likely Agricultural
1945	Lorne Wag	Likely Agricultural
1953 (route 1)	Mark Smith & Beryl Smith	Likely Agricultural
1959	Harold Harding and Martha Harding	Possible Salvage Yard
1962 (route 2)	Bruce Wagg	Possible Salvage Yard
1974	The Bank of Nova Scotia	Likely Vacant
1986	Peter Alexis, as to 50% interest Gino Testa, as to 50% interest	Vacant
1987	Country Ready-Mix Ltd.	Vacant
1987	Gino Testa Construction Ltd.	Vacant
2004	1613871 Ontario Ltd. Marfab Investments Inc.	Vacant
2005	The Corporation of the Township of Uxbridge	Vacant

The ownership of Part of Lot 35 Concession 6, Udora, was transferred to Marfab Investments Inc. and 1613871 Ontario Ltd. in 2004. The ownership of the Phase One Property was subsequently transferred from 1613871 Ontario Ltd. to Marfab Investments Inc. or the Corporation of the Township of Uxbridge in 2005. Marfab Investments Inc. was the previous name of Capris Investments Ltd. The Chain of Title indicates that the Phase One Property was previously owned by private individuals and investors until Marfab Investments Inc. acquired the property in 2004.

One (1) parcel within the Phase One Property was transferred to the The Corporation of the Township of Uxbridge in 2005 from 1613871 Ontario Ltd. and Marfab Investments. According to Mr. Risi, a road was planned to be built on that parcel of land through the Phase One Property but has not been constructed.

4.1.5 CITY DIRECTORY SEARCH

A directory search was completed by Ecolog ERIS as part of an information request for the Phase One Property. Research was done for the Phase One Property and surrounding properties in Polk's York/Durham Region, ON Criss-Cross Directory. The information from the City Directory is summarized in Table 4-3.

A copy of the directory search is included in Appendix B.

Table 4-3 Directory Search Summary

4.2 ENVIRONMENTAL SOURCE INFORMATION

The Environmental Source Information is provided in Table 4-4.

Table 4-4 Environmental Source Information Table

SOURCE	RECORDS REVIEW RESULT
National Pollutant Release Inventory (NPRI)	The Environment Canada National Pollutant Release Inventory for the years 1993-2013 was searched. No records were found for the Phase One Property or for properties within the Phase One Study Area.
PCB Inventories	The MOECC PCB databases for the years 1993 and 2011 were searched. No records were found for the Phase One Property or for properties within the Phase One Study Area.
Ministry of the Environment (MOE) Certificate of Approval (CofA), Permits To Take Water (PTTW) and Certificates of Property Use (CPU)	The MOECC online search engine for the years 1999 to 2016 was searched. No records were found for the Phase One Property or for properties within the Phase One Study Area.
Inventory of Coal Gasification Plants	The MOECC online search engine for the years 1999 to 2016 was searched. No records were found for the Phase One Property or for properties within the Phase One Study Area.
Ministry of the Environment Environmental Incidents, Orders, Offences, Spills, Discharges of Contaminants or Inspections	A request was made to the MOECC - Freedom of Information (FOI) and Protection of Privacy Office for information regarding incidents or activities, which may have occurred on the Phase One Property and represent environmental concern. A response from the FOI Office has not been received at the time this report is being prepared. The MOECC response along with WSP`s interpretation of the information will be forwarded upon receipt.
Ontario Regulation 347 Waste Generators Summary records	The Ontario Hazardous Waste Dataset for the years 1994, 1999, 2001, 2003, 2005, 2006, 2007, 2008, 2010, 2011, 2012, 2013 and 2014 was reviewed. No records were found for the Phase One Property or for properties within the Phase One Study Area.
Waste Management Records	No waste management records were available for review.
Ministry of the Environment Brownfield Environmental Site Registry	The MOECC Brownfield Redevelopment Search Engine was searched for the years 2004-2016. No records were found for the Phase One Property or for properties within the Phase One Study Area.
Technical Standards and Safety Authority	An information request was forwarded to the Public Information Services of the Technical Standards and Safety Authority (TSSA) on July 14, 2016 for information pertaining to the presence of above ground and underground storage tanks located on the Phase One Property. TSSA indicated that the Phase One Property is not registered in the TSSA database for any fuel storage tanks. A summary of the TSSA records is provided in Section 4.2.1.
Ministry of Natural Resources (MNR)	The Ministry of Natural Resources online mapping software was used to search ANSIs on the Phase One Property or within the Phase One Study Area. No ANSIs were identified.
Ministry of the Environment (MOE) Waste Disposal Inventory	The MOECC online Waste Disposal Inventory database (1991) was reviewed. No records were found for the Phase One Property or for properties within the Phase One Study Area.
Water Well Information System	Well Records maintained by the MOECC were reviewed.

4.2.1 TSSA RECORD

A request was made to Public Information Services of the TSSA for detailed information for the Phase One Property. The Fuels Safety Division of the TSSA did not register private fuel underground storage tanks (USTs) or aboveground storage tanks (ASTs) prior to January of 1990 or furnace oil tanks prior to May 1, 2002.

Information received from the TSSA indicated that the Phase One Property is not registered in the TSSA database for any fuel storage tanks.

4.2.1.1 ENVIRONMENTAL RECORDS FOR THE SITE

A review of applicable environmental databases (including but not limited to: active and former waste disposal sites, coal gasification plants, PCB storage sites and registered waste generators) was undertaken for the Phase One Property. No records were found for the Phase One Property.

4.2.1.2 ENVIRONMENTAL RECORDS FOR SURROUNDING PROPERTIES

A review of applicable environmental databases (including but not limited to: active and former waste disposal sites, coal gasification plants, PCB storage sites and registered waste generators) was undertaken for the Phase One Study Area. No records were found for the Phase One Study Area.

4.2.1.3 ENVIRONMENTAL RECORDS SEARCH SUMMARY

The records of environmental concern were identified for the Phase One Property or for properties within the Phase One Study Area. Records for properties located more than 0.25 km away from the Phase One Property boundaries are not expected to impact the site.

Records review documents included in Appendix B.

4.3 PHYSICAL SETTING SOURCES

4.3.1 AERIAL PHOTOGRAPHS

Aerial photographs provide a snapshot of previous land uses on the Phase One Property and on the neighbouring properties for the years that air photos are available.

Aerial photographs for the years 1978, 1988, 1999, 2002, 2005, 2009, 2011, 2012, 2013, 2014 and 2015 were reviewed on the York Region Maps website. Air photos that show a significant change have been included here. Aerial photographs on the York Region Maps website since 2011 consistently have imagery for the Phase One Property. Earlier aerial photographs may not have coverage of the Phase One Property. Table 4-8 provides a summary of observations from the aerial photographs. The aerial photographs are included in Appendix D.

Table 4-8 Aerial Photographs Summary

YEAR	SUBJECT SITE	NEIGHBOURING PROPERTIES
1927	The Phase One Property appears to be a part of an agricultural field. The resolution of the 1927 aerial photograph is poor.	Residential properties are visible along Regional Road 1. The remainder of the Phase One Study Area appears to be used for agricultural purposes.
1959	What appears to be debris is visible throughout the Phase One Property. The resolution of the 1959 aerial photograph is poor.	Residential development along Regional Road 1 has increased. Woodland is visible to the west of the phase One Property. What appear to be residential buildings are visible along Regional Road 32 (Ravenshoe Road).
1966	There is an increased amount of what appears to be debris on part of the Phase One Property. Cleared trails/roads are visible throughout the debris. The resolution of the 1966 aerial photograph is poor.	The property to the west appears to be graded. There is an increase in the development at the intersection of Regional Road 1 and Regional Road 32 (Ravenshoe Road). Grading is visible to the north of the Phase One Property.
1976	Debris is no longer visible on the Phase One Property. A portion of the roadway visible in the previous air photograph is visible.	Grading is no longer visible to the north of the Phase One Property. What appears to be a building with an entrance from Regional Road 1 is visible where grading was previously visible. No significant changes were observed for the remainder of the Phase One Study Area, however it is noted that this may be due to the poor resolution of the 1976 aerial photograph.
1981	The Phase One Property appears to be vacant or part of an agricultural field.	No significant changes were observed for the Phase One Study Area, although it is noted that this may be due to the poor resolution of the 1981 aerial photograph.
1999	The Phase One Property appears to be graded in the center.	A road is visible to the south of the Phase One Property extending west from Concession Road 7 (Regional Road 1). Two (2) buildings are visible along this road.
2005	No significant changes were observed for the Phase One Property compared to the 1999 aerial photograph.	The buildings to the south of the Phase One Property are no longer visible.
2009	No significant changes were observed for the Phase One Property compared to the 2005 aerial photograph.	Bagshaw Crescent and Birdie Smith Court are visible to the south of the Phase One Property. Thirteen dwellings are visible to the south of the Phase One Property along Bagshaw Crescent and Birdie Smith Court.
2013	No significant changes were observed for the Phase One Property compared to the 2009 aerial photograph.	One (1) additional dwelling is visible to the south of the Phase One Property along Bagshaw Crescent.
2015	No significant changes were observed for the Phase One Property compared to the 2013 aerial photograph.	Three (3) additional dwellings are visible to the south of the Phase One Property along Bagshaw Crescent.

The 1959 and 1966 aerial photographs show evidence of activity and debris on the Phase One Property. The aerial photographs support information provided by Mr. Risi about the presence of a salvage yard on the Phase One Property in the 1950s. However, the resolution of the aerial photograph is poor and the activities taking place on the aerial photograph cannot be accurately determined.

Based on the observations made from the aerial photographs, the Phase One Property has historically been used for agricultural purposes, as a potential salvage yard, or has been vacant. The surrounding properties have been used as agricultural, residential, industrial and commercial land from 1927 to present.

4.3.2 TOPOGRAPHY, HYDROLOGY, GEOLOGY

The topography at the Phase One Property generally slopes from the south, at an elevation of approximately 260 metres above sea level (masl), to the north, at an elevation of approximately 245 masl.

The Phase One Property is situated between the Peterborough Drumlin Field and Simcoe Lowlands physiographic regions as defined by Chapman and Putnam (1984). The Phase One Property is between drumlinized till plains and sand plains physiographic landforms (OGS, 2007). The surficial geology in the vicinity of the Phase One Property is described as “stone-poor, sandy silt to silty sand-textured till on Paleozoic terrain” (OGS, 2010).

The underlying bedrock within the area generally consists of limestone of the Simcoe Group; Lindsay Formation. (Armstrong and Dodge, 2007). The bedrock in the vicinity of the Phase One Property is approximately 25-45 metres below ground surface (mbgs), based on bedrock topography mapping (Gao et al., 2006) and topographic mapping (Department of Energy, Mines and Resources, 1988).

Groundwater levels beneath the Phase One Property were noted to vary between 1.2 metres and 20 metres below ground surface according to the static water level information presented on water well records maintained by the MOECC. Based on information from a York Peel Durham Toronto (YPDT) Groundwater Management Study (Kassenaar and Wexler, 2006), the regional groundwater flow direction is to the north-northeast towards Lake Simcoe. Based on the local topography, local groundwater flow is to the north or northeast.

4.3.3 WATER BODIES AND AREAS OF NATURAL SIGNIFICANCE

Uxbridge Brook runs northwest to southeast to a point approximately 240 m northeast of the Phase One Property where the course changes from northwest to southeast to run southwest to northeast. Pefferlaw Brook is approximately 1.28 km west of the Phase One Property and runs in a northeast to southwest direction.

A search of the Ontario Ministry of Natural Resources Natural Heritage Information Centre database showed that the Phase One Property is not within an Area of Natural and Scientific Interest (ANSI). The Phase One Property falls within the jurisdiction of the Lake Simcoe Region Conservation Authority (LSRCA).

4.3.4 WELL RECORD

Well records available from the MOECC dataset indicate that there are two (2) wells on-site, however no wells were observed at the time of site reconnaissance. It is concluded that these wells may have been hidden by vegetation at the time of site reconnaissance. Well records available from the MOECC dataset indicated that there are 62 wells within the Phase One Study Area. The wells within the Phase One Study Area were installed between 1966 and 2014.

The material encountered in the well construction as recorded in the well record for one (1) of the wells on the Phase One Property (ID 4605646) summarized in Table 4-9. Drillers material descriptions as Clay, Stone typically reflect a dense glacial till material consistent with the mapped surficial geology.

Table 4-9 Well Record Information

WELL ID	DEPTH TO WATER (m)	ORIGINAL DEPTH (m)	MATERIAL
4605646	11.0	6.1	Clay, Stone
		40.5	Clay, Stone
		43.2	Limestone

4.3.5 SITE OPERATING RECORDS

The Phase One Property has been used for agricultural purposes or has been vacant since it was patented from the Crown in 1803, according to government records. There is evidence of activity associated with a salvage yard on part of the Phase One Property from the 1950s, ending between 1966 to 1974, which lines up with the information provided by the land owner. At this time, there are plans in place to develop the property into a residential development. There are no specific operation records available for review.

5 INTERVIEW

The owner of Capris Investments Ltd., Mr. Tony Risi, was present at the time of site reconnaissance and provided the following information:

- Capris Investments Ltd. owns the parts of the Phase One Property. Tony Risi became the owner of Capris Investments Ltd. in 2008.
- Building of the estates in the development at Bagshaw Crescent and at Birdie Smith Crescent began in 2004.
- The Phase One Property was in an area used for agricultural purposes at the time it was purchased, although the Phase One Property itself was not being used as farmland.
- The Phase One Property has been vacant since 1988. Other people in the neighbourhood recall a portion of the Phase One Property to have been used as a junk yard/salvage yard in the 1950s.
- The estates that are part of the development along Bagshaw Crescent and Birdie Smith Court are serviced by private wells and individual sewage systems.
- The estates that are part of the development along Bagshaw Crescent and Birdie Smith Court are heated by electricity and propane.
- Fill has never been imported to the Phase One Property or to the estates along Bagshaw Crescent and Birdie Smith Court.
- Marfab Investments Inc. was the previous name of Capris Investments Inc. The name was changed about two (2) years ago.
- Gino Testa was an original investor in the property and a part of Marfab Investments Inc.
- The Corporation of the Town of Uxbridge owns a portion of the Phase One Property. A road was planned to be constructed there to connect to a subdivision to the west of the Phase One Property a few years ago, however neither the road nor the subdivision have been constructed.

6 SITE RECONNAISSANCE

6.1 GENERAL INFORMATION

The reconnaissance of the Phase One Property was conducted by experienced WSP site assessment personnel on July 6, 2016 from 10:00 am to 12:00 pm. At the time of the inspection the weather conditions were sunny. The temperature was approximately 30°C. Select photographs of the Phase One Property and surrounding properties are included in Appendix A.

6.2 SPECIFIC OBSERVATIONS

At the time of the site reconnaissance, the Phase One Property was an unoccupied lot.

There was wire fencing along a portion of the western property boundary. In other areas the western property line was not apparent. The property line to the north was bordered by Ravenshoe Road (Regional Road 32) or was not apparent. The property lines to the east and south were not apparent. The property boundaries are described in Table 6-1.

Table 6-1 Property Boundaries

LOCATION	BOUNDARY DESCRIPTION
East property boundary	None apparent
South property boundary	None apparent
North property boundary	Ravenshoe Road/None apparent
West property boundary	Wire Fencing/None apparent

According to the representative from Capris Investments Ltd., the property has been owned by Capris Investments Ltd. since 2004 and has been vacant since 1988. Additional information provided indicated that the property may have been vacant since 1986.

6.2.1 STORAGE TANKS AND CONTAINERS

No evidence of Underground Storage Tanks (USTs) or Above Ground Storage Tanks (ASTs) was noted during the site reconnaissance.

Information received from the TSSA indicated that the Phase One Property is not registered in the database for any fuel storage tanks.

6.2.2 POTABLE/NON-POTABLE WATER SOURCE

No evidence of municipal water supply or water supply wells was observed on site. The surrounding properties along Bagshaw Crescent and Birdie Smith Court are serviced by private wells. Water well records from MOECC indicate that there may be (or may have been) two (2) wells on the Phase One Property).

6.2.3 UNDERGROUND UTILITIES AND CORRIDORS

Underground utilities and corridors are not anticipated to be present under the Phase One Property. There is a possibility that there may have been some material buried as part of the salvage yard operations as described in the 1950s.

6.2.4 STRUCTURES AND BUILDING FEATURES

No structures were observed on the Phase One Property at the time of site reconnaissance.

6.2.5 EXTERIOR FEATURES

6.2.5.1 WATER SUPPLY

No evidence of municipal water supply or water supply wells was observed on site. The surrounding properties along Bagshaw Crescent and Birdie Smith Court are serviced by private wells. Water well records from MOECC indicate that there may be (or may have been) two (2) wells on the Phase One Property).

6.2.5.2 SEWAGE WORKS

Evidence of sewage works was not observed on the Phase One Property at the time of site reconnaissance. The surrounding properties along Bagshaw Crescent and Birdie Smith Court are serviced by individual private sewage systems.

6.2.5.3 SURFACE COVERAGE

The ground surface of the Phase One Property was primarily covered by vegetation.

6.2.5.4 WATERCOURSES/RAILWAY LINES AND SPURS/RIGHT OF WAYS

No watercourse/Railway Lines or Spurs/Right of Ways were observed on the Phase One Property.

6.2.5.5 STAINED SOIL, VEGETATION OR PAVEMENT

Staining of soil or vegetation was not observed on the Phase One Property.

6.2.5.6 STRESSED VEGETATION

No stressed vegetation was observed during site reconnaissance.

6.2.5.7 FILL AND DEBRIS MATERIAL

Fill and debris material were not observed on the Phase One Property at the time of site reconnaissance. One (1) pile of inert debris, primarily consisting of wood, was observed in the southwest corner of the Phase One Property.

6.2.5.8 POTENTIALLY CONTAMINATING ACTIVITY

There are no potentially contaminating activities (PCA) currently being carried out at the Phase One Property. However, based on information provided by Mr. Risi and from a review of aerial photographs, a salvage yard was present on the Phase One Property in the 1950s until sometime between 1966 and 1974. This corresponds to a PCA as defined by the Ministry of the Environment and Climate Change (MOEEC), salvage yard, including automobile wrecking (PCA #49). The area that was reported to be formerly used as a salvage yard was inspected as part of the site reconnaissance and visible evidence of past activities were not observed.

6.2.5.9 UNIDENTIFIED SUBSTANCES

At the time of site reconnaissance, no unidentified substances were observed on the Phase One Property.

6.2.5.10 SOLID WASTE/WASTE DISPOSAL

As the Phase One Property is vacant, no waste disposal system currently exists.

6.2.5.11 AIR EMISSIONS

No air emissions were observed at the time of the site reconnaissance.

6.2.6 OTHER SPECIAL ATTENTION ITEMS

The potential for the presence of hazardous building materials (polychlorinated biphenyls (PCBs), asbestos containing materials (ACMs), lead, and Ozone Depleting Substances (ODSs), urea formaldehyde foam insulation (UFFI), mould, etc. were examined visually as part of the site reconnaissance. There were no Designated Substances and Hazardous Materials Reports available for the Phase One Property.

6.2.6.1 PCB-CONTAINING ELECTRICAL EQUIPMENT

PCB containing materials and equipment are generally related to fluorescent light fixtures, high intensity light capacitors and hydro transformers.

Six (6) transformers were observed within the Phase One Study Area. It is unknown whether the transformers contain PCBs. At the time of site reconnaissance the transformers were in good condition and there was no evidence of leaks.

6.2.6.2 ASBESTOS-CONTAINING MATERIALS

Asbestos was used as a component of a variety of building materials manufactured before 1984 including mechanical insulation, floor tiles, ceiling tiles, caulking, plasters and wirings.

At the time of site reconnaissance, no buildings were present on the Phase One Property. Asbestos containing materials were not observed on the Phase One Property.

6.2.6.3 LEAD

Lead containing materials (LCMs) are generally related to painted surfaces and lead soldering in plumbing systems.

Painted surfaces or plumbing systems were not observed on the Phase One Property.

6.2.6.4 SILICA

Cement-containing materials are known to contain silica, and are present in the foundation of the buildings. Cement-containing materials were not observed on the Phase One Property.

6.2.6.5 OZONE DEPLETING SUBSTANCES (ODSS)

ODSs are typically used as coolants in refrigerant and air-conditioning equipment and as blowing agents in foam-product manufacturing. The release from cooling equipment can be caused by leaks as well as during installation and servicing.

Cooling equipment was not observed on the Phase One Property.

6.2.6.6 UREA FORMALDEHYDE FOAM INSULATION (UFFI)

No evidence of UFFI was observed during the site reconnaissance and no samples were obtained for lab analysis.

6.2.6.7 MOULD

Visual mould growth was not observed on the Phase One Property.

6.2.6.8 RADON

The decay of uranium to radium and radon gas can be found in areas of bedrock containing black shale and/or granite. The accumulation of radon gas can be harmful when collected in confined spaces such as basements. Based on the review of the available information on the site geology, there is no black shale and/or granite in the shallow subsurface. Therefore there are no environmental concerns relating to radon gas emissions from these rocks.

6.2.6.9 MERCURY

No mercury containing materials were observed during the site reconnaissance.

6.3 INVESTIGATION OF PHASE ONE STUDY AREA

The areas surrounding the Phase One Property are primarily residential and agricultural properties. Commercial and recreational properties are also located within the Phase One Study Area. Specific observations for the adjacent and neighbouring properties surrounding the Phase One Property are provided in Table 6-2.

Table 6-2 Neighbouring Property Description

DIRECTION	ADDRESS	DESCRIPTION
North	5 Victoria Road 1000-10198 Ravenshoe Road	Gas Station, Recreational, Residential
South	1-2 Birdie Smith Court 1-32 Bagshaw Crescent	Residential
East	701-14749 Regional Road 1	Vacant, Residential
West	673-685 Ravenshoe Road	Agricultural, Residential

During the site reconnaissance, it was observed that the surrounding area is comprised of mixed residential, agricultural, commercial and recreational properties. Potentially contaminating activities identified on the neighbouring properties are summarized in Table 6-3.

Table 6-3 Potentially Contaminating Activities on Neighbouring Properties

ADDRESS	DESCRIPTION	PCA	POSITION RELATIVE TO THE SITE
5 Victoria Road	UPI Gas Station	Gasoline and Associated Products Storage in Fixed Tanks (PCA # 28) Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles and Material Used to Maintain Transportation Systems (PCA # 52)	Downgradient
Bagshaw Crescent	Transformers along Bagshaw Crescent within Phase One Study Area	Transformer Manufacturing, Processing and Use (PCA # 55)	Upgradient

6.4 WRITTEN DESCRIPTION OF INVESTIGATION

The reconnaissance of the Phase One Property was conducted by experienced WSP site assessment personnel on July 6, 2016 from 10:00 am to 12:00 pm. At the time of the inspection the weather conditions were sunny. The temperature was approximately 30°C. Select photographs of the Phase One Property and surrounding properties are included in Appendix A.

The Phase One Property consists of three (3) parcels of land that are subdivided into six (6) PINs. The Phase One Property is approximately 3.0 hectares (7.4 acres) in size, irregular in shape, and contained no structures at the time of site reconnaissance. Vegetation was present throughout the entire Phase One Property at the time of site reconnaissance. Intermittent trees were present throughout. The Phase Property is surrounded by agricultural, residential, commercial and recreational properties.

There were no Potentially Contaminating Activities (PCAs) identified on the Phase One Property at the time of site reconnaissance. PCA # 28 and PCA # 52 were identified at the gas station located northeast of the Phase One Property at 9 York Regional Road 32. Six (6) transformers were observed along Bagshaw Crescent. These transformers correspond to PCA #55: transformer manufacturing, processing and use.

7 REVIEW AND EVALUATION OF INFORMATION

The following are the major findings of the Phase One ESA investigation as gathered through site reconnaissance and a review of the available historical information.

7.1 CURRENT AND PAST USE

Based on the records review, it has been determined that part of the Phase One Property may have been used as a salvage yard in 1950s until sometime between 1966 and 1974. The remainder of the Phase One Property has otherwise been historically used as agricultural land or has been vacant. Table 7-1 provides a summary of past and current land use.

Table 7-1 Current and Past Uses of the Phase One Property: Part of Lot 35 Concession 6, Udora Ontario

YEAR (PIN 0191)	NAME OF OWNER	YEAR (PIN 0180)	NAME OF OWNER (PIN 0180)	PROPERTY USES	OTHER OBSERVATIONS FROM AERIAL PHOTOGRAPHS, CITY DIRECTORY, ETC.
1808-1810	George Bond (from Crown)	1808-1810	George Bond (from Crown)	Likely Agricultural	No other information available.
1810-1810	Stephen Bond	1810-1810	Stephen Bond	Likely Agricultural	No other information available.
1810-1810	George Bond	1810-1810	George Bond	Likely Agricultural	No other information available.

1926-1928	Frank Hicks	1926-1928	Frank Hicks	Agricultural	No other information available.
1928-1945	Ross Bagshaw	1928-1945	Ross Bagshaw	Likely Agricultural	In the 1927 air photo shows the Phase One Property as part of an agricultural field. No buildings are visible on site.
1945-1945	Marcella Bagshaw	1945-1945	Marcella Bagshaw	Likely Agricultural	No other information available.
1945-1953	Lorne Wag	1945-1953	Lorne Wagg	Likely Agricultural	No other information available.
1953-1959 (route 1)	Mark Smith & Beryl Smith	1953-1959 (route 1)	Mark Smith & Beryl Smith	Likely Agricultural	No other information available.
1959-1962	Harold Harding & Martha Harding	1959-1962	Harold Harding & Martha Harding	Possible Salvage Yard	What appears to be debris with a path or a roadway throughout is visible in the 1959 aerial photograph. Mr. Risi provided the information that someone who lives in the town had remembered working on a salvage yard on this property in the 1950s.
1962-1974 (route 2)	Bruce Wagg	1962-1974 (root 2)	Bruce Wagg	Possible Salvage Yard	In the 1966 aerial photograph, the amount of debris on the Phase One Property appears to have increased.
1974-1986	The Bank of Nova Scotia	1974-1986	The Bank of Nova Scotia	Vacant	The debris is no longer visible in the 1974 aerial photograph although a remnant of the pathway/roadway is visible.

YEAR (PIN 0191)	NAME OF OWNER	YEAR (PIN 0180)	NAME OF OWNER (PIN 0180)	PROPERTY USES	OTHER OBSERVATIONS FROM AERIAL PHOTOGRAPHS, CITY DIRECTORY, ETC.
1986-1987	Peter Alexis, as to 50% int. Gino Testa, as to 50% int.	1986-1987	Peter Alexis, as to 50% int. Gino Testa, as to 50% int.	Vacant	No other information available.
1987-1987	Country Ready-Mix Ltd.	1987-1987	Country Ready-Mix Ltd.	Vacant	No other information available.
1987-2004	Gino Testa Construction Ltd.	1987-2004	Gino Testa Construction Ltd.	Vacant	Mr. Risi stated that the Phase One Property had been vacant since at least 1988.
2004-2010	1613871 Ontario Ltd. Marfab Investments Inc.	2004-2005	1613871 Ontario Ltd. Marfab Investments Inc.	Vacant	The Phase One Property appears to be vacant in the 2004 and 2009 aerial photographs.
2010-Present	Marfab Investments Inc.	2005-Present	The Corporation of the Township of Uxbridge	Vacant	The Phase One Property appears to be vacant in the 2015 aerial photograph. At the time of site reconnaissance, the Phase One Property was vacant.

7.2 POTENTIALLY CONTAMINATING ACTIVITIES

The potentially contaminating activities identified on-site and in the Phase One Study Area are described in Table 7-2. The potentially contaminating activities are evaluated to assess whether there is potential to affect soil or groundwater associated with the Phase One property.

Table 7-2 Potentially Contaminating Activities

PCA #	POTENTIALLY CONTAMINATING ACTIVITY (O.REG. 153 SCHEDULE E, TABLE 2)	DESCRIPTION	POTENTIAL TO AFFECT PHASE ONE PROPERTY	JUSTIFICATION
PCA-1	Salvage Yard, Including Automobile Wrecking (PCA # 49)	According to information from Mr. Risi and a review of historical aerial photographs, a salvage yard may have existed on part of the Phase One Property in the 1950s until sometime between 1966 and 1974. This corresponds to PCA # 49.	Medium	It is unknown what activities were carried out on the Phase One Property at this time and whether remnants remain in the subsurface of the Phase One Property. The potential for this activity to impact the subsurface environment at the Phase One Property is medium.
PCA-2	Gasoline and Associated Products Storage in Fixed Tanks (PCA # 28)	The property located at 9 York Regional Road 32, northeast of the Phase One Property operates as a gasoline service station. The presence of fuel storage on the east neighboring property corresponds to PCA # 28. The fuelling of vehicles corresponds to PCA # 52.	Low	The UPI gas station is located approximately 115 m northeast of the Phase One Property, down gradient of the Phase One Property with respect to the local and regional groundwater flow directions. Due to its position with respect to the Phase One Property, the potential for these activities to impact the subsurface environment at the Phase One Property is low.
PCA-3	Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles and Material Used to Maintain Transportation Systems (PCA # 52)			
PCA-4	Transformer Manufacturing, Processing and Use (PCA # 55)	Six (6) ground transformers were observed along Bagshaw Crescent at the time of site reconnaissance, corresponding to PCA # 55.	Low	At the time of the site reconnaissance the transformers were in good condition and there was no evidence of leaks. Three (3) of the transformers were also located on concrete pads for secondary containment. At this time it is unknown if the transformers contain PCBs, however it is unlikely that it will impact the soil or groundwater at the Phase One Property.

7.3 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN

The identified Area of Potential Environmental Concern (APEC) at the Phase One Property is described in Table 7-3:

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity (O.Reg. 153 Schedule E Table 2)	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Ground water, soil and/or sediment)
APEC-1	Northeast portion of the Phase One Property	Salvage Yard, Including Automobile Wrecking (PCA #49)	On-Site	PHCs, PAHs, VOCs, Metals and Inorganics	Soil and Groundwater

The extent of APEC-1 has been delineated on Figures 3 and 4 based on review of historical aerial photographs and information provided by Mr. Risi. Inspection of the area during the site reconnaissance showed that the land is vegetated and that there were no visible evidence of the reported historical use.

The PCAs identified on the adjacent properties are considered to have a low potential to affect soil or groundwater beneath the Phase One Property. The gas station located at 9 York Region Road (PCA # 28, PCA # 52) is hydraulically downgradient of the Phase One Property and therefore has a low potential to impact the soil and groundwater conditions at the Phase One Property. The transformers along Bagshaw Crescent were in good condition at the time of site reconnaissance and are unlikely to impact the soil and groundwater conditions at the Phase One Property.

7.4 PHASE ONE CONCEPTUAL SITE MODEL

Figure 4 provides an overview of the Phase One Study Area that illustrates:

- Existing buildings and structures;
- Water bodies;
- Areas of natural significance;
- Drinking water wells;
- Roads;
- PCA's; and
- APECs.

The PCAs and APECs identified for the Phase One Property are summarized in sections 7.2 and 7.3.

A portion of the Phase One Property may have historically been used as a salvage yard (APEC-1). Otherwise, the Phase One Property has historically been used for agricultural purposes or has been vacant. The future intended use of this land is residential.

There are currently no human receptors on the Phase One Property. There are no significant water courses that flow on the Phase One Property and receive drainage directly from the Phase One Property. Uxbridge Brook is present approximately 240 m northeast of the Phase One Property. Pefferlaw Brook is present approximately 1.28 km west of the Phase One Property. The Phase One Property is underlain by a thick sequence of fine grained soils of glaciolacustrine origin. The depth to bedrock is estimated to be in the order of 25 to 45 metres. Based on available well record information, the water table is between 1.2 and 20 metres below ground surface. Based on available information from a regional groundwater study (Kassenaar and Wexler, 2006) and local topography, the groundwater flow direction is toward the north or northeast.

Evidence of water service and private sewage systems was not observed on the Phase One Property at the time of site reconnaissance. The surrounding properties along Bagshaw Crescent and Birdie Smith Court are serviced by private wells and individual private sewage systems.

There were no water wells observed on the Phase One Property at the time of site reconnaissance. Well records from the MOECC indicate that there are two (2) wells on the Phase One Property and 62 wells within the Phase One Study Area. The MOECC water well locations within the Phase One Study Area are shown on Figure 4.

During the records review, WSP relied on information obtained from municipal, provincial and independent sources as referenced in this report. Although the information was assessed for consistency, the accuracy or the completeness of this third party information was not independently verified.

WSP made all reasonable inquiries to obtain accessible information for this assessment. All responses to information requests were received prior to completion of this report except for the Freedom of Information Request submitted to the MOECC. The MOECC response along with WSP`s interpretation of the information will be forwarded upon receipt. The evaluation provided in this report reflects our best judgment in light of the information available at the time of report preparation.

8 PHASE ONE ESA CONCLUSION

WSP was retained by Tony Risi of Capris Investments Ltd. to conduct a Phase One Environmental Site Assessment (ESA) for the property located at Part of Lot 35 Concession 6, in the Town of Udora, Ontario (Phase One Property). The purpose of a Phase One ESA is to identify potential environmental concerns that relate to past and present on-site and off-site activities. WSP understands that the Phase One ESA was requested to identify potential environmental concerns that relate to past and present activities on-site and off-site on nearby properties

The Phase One ESA followed the practices of *Ontario Regulation 153/04 as amended*. At this time, WSP understands that filing a Record of Site Condition (RSC) is required because the future land use is considered to be more sensitive than present/past land use. The Phase One ESA report describes the interpreted environmental conditions at the Phase One Property and provides conclusions for your consideration.

The findings of the Phase One ESA are:

- The Phase One Property is located west of Ravenshoe Road (Regional Road 32) and south of Concession Road 7 (Regional Road 1) in Udora, Ontario. The Phase One Property is approximately 3.0 hectares (7.4 acres) in size, irregular in shape, and contained no structures at the time of site reconnaissance.

- The Phase One Property is comprised of three land parcels. The ownership of Part of Lot 35 Concession 6, Udora, was transferred to Marfab Investments Inc. and 1613871 Ontario Ltd. in 2004. The Chain of Title indicates that full ownership was transferred from 1613871 Ontario Ltd. to Marfab Investments Inc. in 2010. Mr. Risi confirmed that Marfab Investments Inc. was the previous name of Capris Investments Inc. Mr. Risi informed the site assessor that there was a plan to construct a road through the property a few years ago. The construction of this road has not taken place. According to the chain of title, ownership of one (1) parcel of the Phase One Property was transferred to The Corporation of the Township of Uxbridge in 2005. This parcel is a "T" shape that separates the two parcels now owned by Capris Investments Inc.
- The Chain of Title indicates that the Phase One Property was previously owned by private individuals and investors until Marfab Investments Inc. purchased the Phase One Property in 2004.
- The owner of Capris Investments Ltd., Mr. Tony Risi, was interviewed on July 6, 2016 as part of the Phase One Investigation.
- Information provided by Mr. Risi as well as from a review of historical aerial photographs indicates that a salvage yard may have been present on the Phase One Property in the 1950s until sometime between 1966 and 1974. Otherwise, the Phase One Property has historically been used for agricultural purposes or has been vacant. No records were identified for the Phase One Property or for Properties within the Phase One Study Area in a review of Environmental Records.
- The topography at the Phase One Property generally slopes towards the north. The elevation at the Phase One Property ranges from 260 metres above sea level (masl) to 245 masl.
- The Phase One Property is situated between the Peterborough Drumlin Field and Simcoe Lowlands physiographic regions as defined by Chapman and Putnam (1984). The Phase One Property is between drumlinized till plains and sand plains physiographic landforms (OGS, 2015). The surficial geology in the vicinity of the Phase One Property is described as "stone-poor, sandy silt to silty sand-textured till on Paleozoic terrain" (OGS, 2015). The depth to bedrock is approximately 25-45 metres below ground surface (mbgs) based on bedrock topography mapping (Brennand et al., 1998) and topographic mapping (Department of Energy, Mines, and resources, 1988) and topographic mapping (Department of Energy, Mines and Resources, 1988). The underlying bedrock within the area generally consists of limestone, dolostone, shale, arkose, and sandstone of the Simcoe Group; Lindsay Formation (Armstrong and Dodge, 2007).
- Groundwater levels beneath the Phase One Property were noted to vary between 1.2 metres and 20 metres below ground surface according to the static water level information presented on water well records maintained by the MOECC. Based on information from a York Peel Durham Toronto (YPDT) Groundwater Management Study (Kassenaar and Wexler, 2006), the regional groundwater flow direction is to the north-northeast towards Lake Simcoe. Based on the local topography, local groundwater flow is to the north or northeast.
- Evidence of water service and sewage works was not observed on the Phase One Property at the time of site reconnaissance. The surrounding properties along Bagshaw Crescent and Birdie Smith Court are serviced by private wells and private individual sewage systems.
- Inert debris was observed in one (1) location on the Phase One Property.
- Information from Mr. Tony Risi and from a review of aerial photographs indicates that there may have been a salvage yard on the northeast portion of the Phase One Property in the 1950s until sometime between 1966 and 1974. Visible evidence of this historic use was not observed during the site reconnaissance. There was vegetation cover on the ground surface in the area where these activities are reported to have taken place. This activity would correspond to PCA # 49: Salvage Yard, Including Automobile Wrecking.

- Other PCAs identified within the Phase One Study Area include gasoline and associated products storage in fixed tanks (PCA # 28); storage, maintenance, fuelling and repair of equipment, vehicles, material used to maintain transportation systems (PCA # 52) and transformer manufacturing, processing and use (PCA # 55). These PCAs reflect the gas station located at 9 York Regional Road 32 (PCA #28 and PCA # 52) and the presence of six (6) ground transformers along Bagshaw Crescent.

The Phase One ESA identified potentially contaminating activities (PCAs) and assessed the potential for these PCAs to affect the Phase One Property. The PCA identified on-site that corresponds to the historical salvage yard, is identified as; (PCA #49): Salvage Yard, Including Automobile Wrecking, and is considered to present potential to affect soil and/or groundwater beneath the Phase One Property. This PCA is considered to contribute to one (1) area of potential concern (APEC) on the northeastern portion of the Phase One Property. The other identified PCAs are not considered to present potential to affect soil or groundwater beneath the Phase One Property due to the nature of the activities and the groundwater flow direction.

A Phase Two ESA will be required to assess conditions on the Phase One Property and within the APEC relative to the provincial Site Condition Standards.

In accordance with O.Reg. 153/04 a Record of Site Condition (RSC) is required for the Phase One Property because there is evidence of historical industrial land use in the area of the proposed residential subdivision. This corresponds with the area of the identified APEC within the northern property owned by Capris Investments Ltd.

9 ASSESSOR QUALIFICATIONS

The Phase One site reconnaissance, records review and reporting was completed by Mr. Daniel Oliveira. The Phase One ESA was directed and overseen by Mr. Lloyd Lemon.

Mr. Daniel Oliveira, B.Sc. Eng., E.I.T., applies his four (4) plus years of environmental consulting experience at commercial, residential, and industrial properties, landfill sites, aggregate extraction sites and agricultural properties across Ontario. Mr. Oliveira has conducted numerous Phase One and Phase Two Environmental Site Assessments, compliance monitoring programs, subsurface investigations, remediation work, and hydrogeological field work across the Greater Toronto Area and Ottawa region since 2011. Routine tasks have both field and office components including water quality monitoring activities, site reconnaissance activities, drill rig and contractor supervision, soil and aggregate inspection and identification, and report and proposal writing.

Mr. Lloyd Lemon, M.Sc., P.Geo. is a Qualified Person under the Ministry of Environment Brownfield Regulation 153/04. He is a Senior Geoscientist with WSP. Mr. Lemon has more than 30 years' experience as a geoscientist and has been registered as a Professional Geoscientist since 2001. Mr. Lemon has a strong technical background with experience in disciplines ranging from regional geological and hydrogeological understanding, contaminant hydrogeology, contaminant fate and transport, contaminant removal/remediation, groundwater geochemistry, rock-water interaction (chemical), environmental impact assessments, drinking water source protection, and risk management. Mr. Lemon has applied this technical background in environmental assessment and remediation projects on many scales and involving many contaminant types in Ontario, Atlantic Canada, and Maine. Mr. Lemon has expertise in detailed characterization of complex sites involving hydrocarbons, dense non-aqueous phase liquids, and fractured rock.

10 LIMITATION AND CLOSURE

This report was prepared for the exclusive use of Capris Investments Inc. Third parties cannot rely on the findings and conclusions without written notification from WSP.

WSP warrants that the findings and conclusions contained herein have been prepared in accordance with generally accepted environmental site assessment methods. There is a possibility that materials may exist which could not be reasonably identified within the scope of the assessment or which were not apparent during the Site reconnaissance. WSP believes that the information collected during the assessment period concerning the property is reliable. However, WSP cannot warrant or guarantee that the information provided is absolutely complete or accurate beyond current environmental consulting standards.

The findings available at the time of the preparation of the Phase One ESA and the conclusions made based on the findings are included in this report. Please note that with time the environmental condition of the Phase One Property can change. Conclusions related to conditions on the Phase One Property are based upon information gathered at the time of the assessment and may not be valid should Site conditions or related regulatory requirements change in the future.

WSP Inc. reserves the right to amend and/or supplement this report in the event additional information, documentation or evidence becomes available. If any conditions become apparent that differ significantly from our understanding of conditions as presented in this report, we request that we be notified immediately to reassess the conclusions and recommendations provided herein.
